Mr. Geoffrey Griffis
Chairman
District of Columbia Board of Zoning Adjustment
441 4th Street, NW, Suite 210
Washington, DC 20002

Dear Mr. Griffis:

Our daughter attends NCRC and I am writing in support of NCRC's project to improve the school. We are third generation District of Columbia residents and are supportive of the expansion of NCRC. Our daughter, who has special needs as a child due to her being born with vision impairment, is in need of and benefits from the educational mission of diversity and special needs care that is the experience of NCRC.

We have reviewed the proposed plans for the addition and new building and believe that the design is compatible with the historic character of the site and in keeping with the character of the historic district. The new building is designed to appear residential in character and is in keeping with the height and density of other structures in the neighborhood. The architect has done a wonderful job of accommodating both the school's needs and the neighbors' concerns.

We chose to send our daughter to NCRC because we believe in the school's mission, and we see every day how the school tries to live its mission. It is a school that believes strongly in doing the best it can for each child, and it also brings together a unique mix of families from different racial, socio-economic backgrounds, as well as a mixture of children with special needs and typically developing children. Given our daughter's special needs we trust NCRC's success at integrating special needs children, and for that we are grateful that our daughter can experience this school.

We have been very impressed with NCRC's plans for improving the current facility. Anyone who has spent time there can see their need for more space. Since there are at least two children with special needs in each classroom, of which one is our daughter, I feel strongly that taking down the number of children in each class makes sense. In order to accomplish this and not bring down the size of the current population, the school proposes adding two new classrooms. I think these new classrooms will be extremely beneficial to the program and not simply because they will allow a reduction of the

current class sizes. Having these two new classrooms, which are slated to be full-day programs—one for older children and one for younger children—will also offer much more flexibility for working parents who need a longer day for their kids.

We admire what NCRC has done in response to neighborhood concerns. After receiving input at more than a dozen neighborhood meetings, they have cut back the size of the proposed new building significantly. They have already begun to make changes in their traffic management plan, and it is clear that they are working very hard to ensure that there will be no adverse impacts from the dropping off or picking up of children.

We firmly support the school and hope you will also support their efforts. Thank you very much.

Sincerely,

Kim Alfonso
