Concerning Case # 17022 Edmund Burke School

Dear Chairman Griffis:

I am writing in response to an up incoming case to be heard this week by the BZA --July 15, 2003.

I am in support of the changes that Edmund Burke School has made in working with the neighbors, DDOT, and larger community in changing traffic patterns and the good faith efforts to maintain these changes through creative innovations in compliance building.

One year ago the committee asked Burke to handle and show a plan that will mange traffic in the residential neighborhood. They have done this and continue to proceed with utmost seriousness regarding compliance. In addition, Burke has been a valuable partner to education in the District of Columbia for over 30 years. The changes that are requested can only enhance the program and are relatively minor in helping the school provide excellent education in a city environment.

Please support Edmund Burke School's application for renewal.

Sincerely,

Jim Martin / Kitty Montie
