Re: February 24, 2004 Hearings:
BZA Application No. 17108
(Application of Folger Park North, LLC for a variance) and

BZA Application No. 17085
(Appeal of Larry and Louise Smith and Mary Ann Snow regarding building permit)

Dear Chairman Griffis and Fellow Board Members:

Please be advised of the following in these cases:

As stated to the Board on January 27, 2004, I am representing Folger Park North LLC ("Folger") in its request for an area variance in Case No. 17108 and in its opposition to the appeal filed in Case No. 17085. Written authorization is attached as Exhibit A. Both cases are scheduled for hearing on February 24, 2004 starting first with the application for an area variance.

STATEMENT OF THE CASE

A) Background

The subject properties are located at 206-208-210 D Street, S.E. and are zoned CAP/R-4 and face onto Folger Park. If the variance is granted, these properties will be the only row houses in the square (763) facing the park.

BZA
Case No. 17108
Exhibit No. 31

Board of Zoning Adjustment
District of Columbia
CASE NO. 17108
EXHIBIT NO. 31A1

B) Zoning

The R-4 zone requires, for row dwellings and flats, that lots be at least 1,800' in size with at least 18' widths, with certain exceptions. Section 401.3 of the Zoning Regulations. The maximum height is 40', no FAR limit is prescribed, and no side yard is required.

The Capitol Interest District (CAP) overlay was established for "controlling land use as well as height and bulk" in its district. Section 1200.3 and 1200.7 of the Zoning Regulations. With certain exceptions, height is limited to 40' and FAR to 1.8. Section 1203.1 and 1203.3.

C) Applicant's Position

Folger's primary position is that its construction of three row houses on the subject property was matter of right under zoning. Folger relied on a recorded plat for the subject property land indicating three (3) subdivided 800 lots (800-801-802). The lots were once improved with three residential houses (circa 1928) and later by a Pepco substation, all constructed prior to 1958, when the zoning regulations here in issue became effective.

When Folger applied for a building permit, the 800 lots were converted to record lots (26-27-28) as part of the subdivision process and approved by zoning for building purposes. Folger submits that lot 801 (27) was exempt from the lot size and width requirements of Chapter 4 by reference to Section 401.1.[1] Folger submits lots 800 and 802 (26 and 28) were likewise exempt under Section 401.2.[2]

---

[1] Except as provided in chapter 20 through 25 of this title, in the case of a building located, on May 12, 1958, on a lot area or width of lot, or both, less than is prescribed in§401.3 for the district in which it is located, the building may not be enlarged or replaced by a new building unless it complies with all other provisions of this title. (Emphasis supplied)

[2] Except as provided in§401.3, in the case of an unimproved lot in single ownership on November 1, 1957, which has an area or width of lot less than that specified in§401.3 for the district in which it is located and which does not adjoin another unimproved lot in the same ownership a structure may be erected on the lot if both the area and width of lot are at least eighty percent (80%) of the area and width of lot specified under§401.3; provided, that the structure shall comply with all other provisions of this title. (Emphasis supplied)

Assuming arguendo that the continued existence of the Pepco substation after 1958 on the subject lots (partially located on lots 800 and 802 (26 and 28) and fully on lot 801 (27)), required a variance, Folger contends that an area variance for the lot width (11% for each) and the lot area (15%, 15% and 17%) is justified since:

- **Practical Difficulty** - if the three (3) lots are combined into two (2) lots to meet the current zoning requirements of width and area, the resulting two (2) lots of approximately 2,252' each in size and 24' in width will be out of proportion with the neighboring row houses, many of which are less than 1,500' in size and around 16' in width. If Folger were to build two (2) row houses under current zoning regulations, they would have approximately 5,000 sq. ft. each or 10,000 sq. ft. of building area, greater than that which the 3 row houses combined will contain of approximately 9,000 sq. ft. Given the CAP overlay and historic district restrictions, it is doubtful that HPRB would agree to a design plan for two (2) row houses. See Exhibit J.

  By granting the variances, the subject 3 lots will be consistent with the lot size and width of surrounding row houses. See attached BZA cases, Exhibit K, L and M.

- **Exceptional Situation** - Zoning officials on numerous occasions advised Folger that construction of three row houses on the three 800 lots/three record lots was matter of right zoning without the need for a variance:

  > Pre-permit, during the initial application process, and multiple times during the building application process.

Indeed, zoning officials even advised HPRB staff independently that the project qualified for matter of right zoning, in the course of the HPRB approval process.

- **Hardship** - Denial of the variances requested will cause extreme hardship on Folger and possible bankruptcy for its investors, who have already expended $2.4 million under the impression that construction of the three row houses was matter of right zoning.

- **Public Good** - Further, granting the variance is not detrimental to the public good. In fact, the opposite is true. The project is consistent with the historic neighborhood in terms of lot and width size and architectural

design. DCRA's original approval of the project as a matter of right brought about the razing of an unsightly and out of character abandoned substation in the square.

Finally, granting the variance is not inconsistent with the general intent and purpose of the Zoning Regulations which is to foster low density residences in this district. Compare §1570.2(d) of the CHC District (Capitol Hill Commercial Overlay District) which seeks "appropriate incentives for new infill construction that is compatible with the Capitol Hill Historic District and its predominance of low scale row house structures."

1. In support of its application for an area variance, Folger intends to call the following witnesses:

   A. William J. Maiden, architect

   B. Fred Greene, zoning consultant

   C. Alger Stoneburner, a member of Capitol City Development, LLC which, in turn, is a member of Folger

   D. Denzil Noble, DCRA, Zoning Administrator's Office

   E. Toye Bello, formerly in the Zoning Administrator's Office.

2. In support of its application for an area variance, Folger intends to submit the following evidence:

   A. A copy of a plat for a building permit from the D.C. Surveyor's office dated April 25, 1942 indicating Lots 801-802-803 in Square 763 and the outline of the Pepco substation on those lots.

   B. A copy of the subdivision plat for 206-208-210 D Street, S.E., showing record lots 26-27-28 replacing lots 801-802-803 in Square 763 with a certification by the Zoning Administrator's office that the subdivision complies with requirements of the zoning regulations attached as Exhibit C.

   C. A copy of the Sanborn Fire Map of 1928 for Square 763 attached as Exhibit D.

D. Copies of the permit application and control batch sheet indicating zoning approval attached as Exhibit E.

E. Pictures of the former Pepco substation on the site, recent pictures of the site with improvements under construction, and final design plans attached as Exhibit F.

F. A letter from Fred Greene to Robert Kelly, then D.C. Zoning Administrator, regarding the subject site subdivision and zoning dated February 26, 2003, attached as Exhibit G.

G. A copy of the HPRB staff report and recommendation regarding the conceptual design review by the HPRB for the subject property, attached as Exhibit H, indicating that staff had confirmed with the Zoning Administrator that BZA approval was not required.

H. A copy of permits (raze, foundation and balance of building construction) issued to Folger for the subject property, attached as Exhibit I.

I. A copy of the ownership and land area records in Square 763 and summary chart indicating how the average land area for row and semi-detached houses in the Square (1,448') compared to the Subject Property (1,501') attached as Exhibit I.

J, K & L. Copies of BZA cases where area variances were granted under similar circumstances.

Sincerely,

Richard L. Aguglia

Re: 210 D Street, SE

Dear Mr. Kelly:

As a follow-up to our telephone conversation this afternoon with you, Mr. Denzell Noble and Ms. Faye Agunney, I am enclosing a subdivision plat and related material that demonstrate that the above referenced property was subdivided and had, and continues to have, a building on its premises prior to 1958 or the date in which the new zoning regulations took effect. Our objective is to demolish the existing building, and to build three townhouses within the boundaries of the three platted lots. We have obtained a permit to demolish the building. Additionally, we have the approval of the ANC, the Fine Arts Commission, and the Capitol Hill Restoration Society.

We are scheduled to appear before the HPRB tomorrow night. It is our understanding that the staff report is favorable.

Should you have any questions, please feel free to call me on 202-965-1411. Thanks.

Kind regards,

Fred L. Greene
