Re: 910 M Street, N.W., BZA Application No. 17167
Multiple Variances

Dear Chairman Griffis and Members of the Board:

On April 7, 2004, at a publicly-noticed meeting and with a quorum present, Advisory Neighborhood Commission (ANC) 2F voted unanimously (6-0-0) to approve the recommendation of its Community Development Committee to support the application of Faison Enterprises to the Board of Zoning Adjustment for multiple variances, as discussed below, for the above-referenced property.

The redevelopment of the subject property as an apartment building is viewed positively by the community, favoring it over its current usage as a surface parking lot.

We note that the subject site has an unusual shape and is impacted by several unique and exceptional situations or conditions, including a 20 foot "no build" easement on its western frontage, a setback area of 40 feet above a 60 foot plane on its northern frontage, and a narrow depth of lot along its eastern frontage which is exacerbated by the 40 foot setback zone previously referenced. The confluence of these factors and the requirement within the DD Zone that properties have at least 75% frontage on the street wall at or within 4 feet of the property line, create a situation where reasonable utilization of the site necessitates the granting of several variances and a special exception. These areas of BZA relief are summarized as follows:

1. Roof structure special exception to permit multiple roof structures of unequal height and potentially not meeting the setback requirements so as to permit roof access for the residential recreation space with a minimum of roof structure and providing Code compliant means of egress with stair towers. (Section 411)

Case No. 17167
Exhibit No. 26

Board of Zoning Adjustment
District of Columbia
CASE NO. 17167
EXHIBIT NO. 26

2. Court variance for the eastern leg of the property so as to permit a reasonably functioning core for the east wing of the apartment building. (Section 776.3)

3. Lot occupancy variance as various setback requirements create a larger floor plate than would otherwise occur including the street frontage requirements of DD in an area where there is a mandatory setback at the upper levels. (Section 772.1)

4. Variance to permit bay projections into the 40' setback along M Street to break up the façade of the building. (Section 1706.15)

5. Partial rear yard variance to help compensate for the setback required at the 60' height limit for a distance of 40' along the M Street frontage. The building must be pushed back due to a special provision in Section 1706.15 of the Zoning Regulations, and the Applicant is trying to compensate for an under FAR building. (Section 774.1)

6. Variance from the 35' lot line extension to permit a 40' extension of the DD/C-2-C zone into the DD/C-2-A zone as only a 5' strip would remain in C-2-A, causing an odd design and building inefficiencies. (Section 2514.2)

It is our understanding that the Applicant will reappear before the ANC to discuss construction scheduling plans, traffic flow during construction, material selection and detailing of the design.

The Office of Planning has accepted these variances.

The ANC understands that the unique circumstances inherent in this project result in a situation where the strict application of the Zoning Regulations would result in peculiar and exceptional practical difficulties for the Applicant. After careful consideration of the developer's intentions and the presentation made before the Community Development Committee, the ANC views the project favorably.

THEREFORE, Advisory Neighborhood Commission 2F supports this Application and urges the Board of Zoning Adjustment to grant the above outlined variance relief and special exception.

Thank you Mr. Chairman and members of the Board for according great weight to our views.

Sincerely,

Cary Silverman
Chair, ANC 2F
