Case No. 17211
Exhibit No. 31

Board of Zoning Adjustment
District of Columbia
CASE NO. 17211
EXHIBIT NO. 31

subpart, the provisions of this subpart shall govern.

[55 FR 20396, May 16, 1990]

§1.1304 Information and assistance.

For general information and assistance concerning the provisions of this subpart, the Office of General Counsel may be contacted, (202) 632–6990. For more specific information, the Bureau responsible for processing a specific application should be contacted.

§1.1305 Actions which normally will have a significant impact upon the environment, for which Environmental Impact Statements must be prepared.

Any Commission action deemed to have a significant effect upon the quality of the human environment requires the preparation of a Draft Environmental Impact Statement (DEIS) and Final Environmental Impact Statement (FEIS) (collectively referred to as EISs) (*see* §§1.1314, 1.1315 and 1.1317). The Commission has reviewed representative actions and has found no common pattern which would enable it to specify actions that will thus automatically require EISs.

NOTE: Our current application forms refer applicants to §1.1305 to determine if their proposals are such that the submission of environmental information is required (*see* 1.1311). Until the application forms are revised to reflect our new environmental rules, applicants should refer to §1.1307. Section 1307 now delineates those actions for which applicants must submit environmental information.

1.1306 Actions which are categorically excluded from environmental processing.

(a) Except as provided in §1.1307 (c) and (d), Commission actions not covered by §1.1307 (a) and (b) are deemed individually and cumulatively to have no significant effect on the quality of the human environment and are categorically excluded from environmental processing.

(b) Specifically, any Commission action with respect to any new application, or minor or major modifications existing or authorized facilities or equipment, will be categorically excluded, provided such proposals do not:

(1) Involve a site location specified under §1.1307(a) (1)–(7), or

(2) Involve high intensity lighting under §1.1307(a)(8).

(3) Result in human exposure to radiofrequency radiation in excess of the applicable safety standards specified in §1.1307(b).

NOTE 1: The provisions of §1.1307(a) of this part requiring the preparation of EAs do not encompass the mounting of antenna(s) on an existing building or antenna tower unless §1.1307(a)(4) of this part is applicable. Such antennas are subject to §1.1307(b) of this part and require EAs if their construction would result in human exposure to radiofrequency radiation in excess of the applicable health and safety guidelines cited in §1.1307(b) of this part. The provisions of §1.1307 (a) and (b) of this part do not encompass the installation of aerial wire or cable over existing aerial corridors of prior or permitted use or the underground installation of wire or cable along existing underground corridors of prior or permitted use, established by the applicant or others. The use of existing buildings, towers or corridors is an environmentally desirable alternative to the construction of new facilities and is encouraged. The provisions of §1.1307(a) and (b) of this part do not encompass the construction of new submarine cable systems.

NOTE 2: The specific height of an antenna tower or supporting structure, as well as the specific diameter of a satellite earth station, in and of itself, will not be deemed sufficient to warrant environmental processing, *see* §§1.1307 and 1.1308.

NOTE 3: The construction of an antenna tower or supporting structure in an established "antenna farm": (i.e., an area in which similar antenna towers are clustered, whether or not such area has been officially designated as an antenna farm), will be categorically excluded unless *one or more of the antennas to be mounted on the tower or structure are subject to the provisions of §1.1307(b) and the additional radiofrequency radiation from the antenna(s) on the new tower or structure* would cause human exposure in excess of the applicable health and safety *guidelines* cited in §1.1307(b).

[51 FR 15000, Apr. 22, 1986, as amended at 51 FR 18889, May 23, 1986; 53 FR 28393, July 28, 1988; 56 FR 13414, Apr. 2, 1991; 64 FR 19061, Apr. 19, 1999]

§1.1307 Actions that may have a significant environmental effect, for which Environmental Assessments (EAs) must be prepared.

(a) Commission actions with respect to the following types of facilities may significantly affect the environment and thus require the preparation of EAs by the applicant (see §§1.1308 and 1.1311) and may require further Commission environmental processing (*see* §§1.1314, 1.1315 and 1.1317):

(1) Facilities that are to be located in an officially designated wilderness area.

(2) Facilities that are to be located in an officially designated wildlife preserve.

(3) Facilities that: (i) May affect listed threatened or endangered species or designated critical habitats; or (ii) are likely to jeopardize the continued existence of any proposed endangered or threatened species or likely to result in the destruction or adverse modification of proposed critical habitats, as determined by the Secretary of the Interior pursuant to the Endangered Species Act of 1973.

NOTE: The list of endangered and threatened species is contained in 50 CFR 17.11, 17.22, 222.23(a) and 227.4. The list of designated critical habitats is contained in 50 CFR 17.95, 17.96 and part 226. To ascertain the status of proposed species and habitats, inquiries may be directed to the Regional Director of the Fish and Wildlife Service, Department of the Interior.

(4) Facilities that may affect districts, sites, buildings, structures or objects, significant in American history, architecture, archeology, engineering or culture, that are listed, or are eligible for listing, in the National Register of Historic Places. (*See* 16 U.S.C. 470w(5); 36 CFR 60 and 800.)

NOTE: The National Register is updated and re-published in the FEDERAL REGISTER each year in February. To ascertain whether a proposal affects a historical property of national significance, inquiries also may be made to the appropriate State Historic Preservation Officer, *see* 16 U.S.C. 470a(b); 36 CFR parts 63 and 800.

(5) Facilities that may affect Indian religious sites.

(6) Facilities to be located in a flood Plain (*See* Executive Order 11988.)

(7) Facilities whose construction will involve significant change in surface features (e.g., wetland fill, deforestation or water diversion). (In the case of wetlands on Federal property, *see* Executive Order 11990.)

(8) Antenna towers and/or supporting structures that are to be equipped with
