ATTACHMENT C
Statement of Existing and Intended Use

Existing Use

The part of the building that will be extended is currently used as a kitchen. The current galley kitchen provides inadequate countertop space, cabinets, or ventilation. The space between the oven and the corner cabinet near the dining room door is so narrow that it is difficult and awkward to pass. Furthermore, because the galley is so narrow, there is absolutely no room to pass through if the dishwasher door or the refrigerator door is open.

Intended Use

The addition will expand the existing kitchen and would allow better and more efficient use of the space, allowing for much needed countertop space, cabinets, and updated appliances positioned in more ergonomic locations. The expanded kitchen would also permit much improved flow of movement of circulation.
