John Murray, RA, LEED® AP

Mr. Murray has over twenty-nine years of professional experience in architecture. He received his Bachelor of Architecture in 1974 from the University of Virginia, where he also participated in the European Study Program in Vicenza, Italy. Mr. Murray is a Senior Project Manager, and prior to joining Hickok Warner Cole Architects, he was a Principal and the Production Director of Jennings & Murray, Architects, PC. He is currently affiliated with the National Council of Architectural Registration Boards, the Association for Preservation Technology and the Historical Society of Washington, DC.

Recent Projects:

Latin American Montessori Bilingual Public Charter School, Washington, DC
Senior Project Manager for the renovation and historic preservation of a circa 1911 historic school building for use by the Latin American Montessori Bilingual Public Charter School. The project, located at the historic Military Road School at 1375 Missouri Avenue, NW, will include a 12,000 sf addition. The renovated learning facility will be designed to support and facilitate the Montessori teaching method.

World Public Charter School of Washington, Washington, DC
This project included a feasibility study for code review, existing conditions analysis and prospective properties, including the Military Road School located at 1375 Missouri Avenue, NW. The renovation design for this District of Columbia School Building built in 1912 was designed to provide an up-to-date facility for an innovative, multi-lingual teaching program.

World Public Charter School at the Capital Children's Museum, Washington, DC
This project included full design services for a 9,900 sf, temporary classroom facility at the Capital Children's Museum.

500 12th Street, SW at Potomac Center, Washington, DC
Senior Project Manager for the north tower of this renovation and addition project located at 500 and 550 12th Street in southwest Washington, DC, targeted for GSA tenants. The existing eight-story, 560,000 gsf office building is in the process of being expanded to approximately 1,000,000 gsf and will include two separately functioning office buildings. The floor plates will be expanded and three floors will be added to the top of the building, providing a new massing approach that reinforces the two building concept. Entrance towers help to further define each mass and provide hierarchy to the facades. This facility was designed to meet DOJ Level 4 security requirements.

5001 Eisenhower Avenue, Alexandria, VA
Senior Project Manager for the proposed renovation of a 577,000 sf 1970s office building. The renovated building will include specific design criteria and will be targeted at GSA tenants. In addition, a building of approximately 400,000 sf will be added to the sixteen acre site and also will be targeted at GSA tenants.

Case No. 17265
Exhibit No. 28

Board of Zoning Adjustment
District of Columbia
CASE NO. 17265
EXHIBIT NO.28

Federal Gateway, Washington, DC
This new 300,000 gsf building is located on New Jersey Avenue, across from the Federal Center in the rapidly developing Anacostia waterfront/Capitol Gateway area of southeast Washington. The building offers views toward the U.S. Capitol and the Anacostia River. Federal Gateway has nine floors of office space, one floor of retail space, and three levels of below-grade parking.

1900 Duke Street, Alexandria, VA
This new 110,000 sf building office building is located in historic Old Town Alexandria at the entrance to Carlyle Square. The project includes five floors of office space, ground level retail space and three-levels of underground parking. The project location required review by the Architectural Review Board for compliance with the Carlyle Design Guidelines.

Projects listed below are affiliated with other firms:

New Classroom Building – Georgia Military College, Milledgeville, GA
This project included the design and construction of a new 30,000 sf, $3 million classroom facility on the historic campus of Georgia Military College. In addition to classrooms, the space includes science laboratories and a campus computer center.

Old State Capitol Building Renovation - Georgia Military College, Milledgeville, GA
Mr. Murray was the Production Director for the $7 million renovation of the Old State Capitol Building. This involved the restoration/renovation of the historic 1805, 1827-33 gothic building including classrooms, administrative offices, auditorium, multi-purpose room and museum.

Washington Harbour, Washington, DC
Project team leader for this $200 million project, which involved directing a team of fourteen architects in the production of construction documents, contract administration and tenant coordination. Responsibility included 109,000 SF East Building, underground parking garage, Fountain/Plaza Level and the Tower, commercial office and retail space, restaurants and a gallery/promenade.

Mr. Murray is a licensed architect in the District of Columbia, Commonwealth of Virginia, and the States of Delaware, Georgia, and Maryland. He became LEED® certified in sustainable design from the US Green Building Council in 2004.
