RE: BZA# 17268

Dear Director Kress,

The Capitol Hill Restoration Society Zoning Committee at a meeting held on December 9, 2004, considered the above case. The property is located at 315 7th Street, NE. The applicant proposes an addition to the rear of the structure that will increase the lot occupancy from 66% to 70%. The applicant needs a special exception because the home is allowed only 60% lot occupancy.

The committee believes that the impact on light and air is minimal in this case and that the privacy of use and enjoyment of neighboring properties is not unduly compromised. Furthermore, since the modest addition is in the rear of the property, the streetscape is not harmed. For these reasons, the Committee voted unanimously to support the application.

Respectfully,

Gary M. Peterson, Chair
Capitol Hill Restoration Society
Zoning Committee

CC: Jay Adelstein
