2004 DEC 21 PM 3:48

APPEAL OF EASTERN TRANS-WASTE OF MARYLAND, INC.

NATURE OF RELIEF SOUGHT

1. Appellant Eastern Trans-Waste of Maryland, Inc. (Appellant or ETW) seeks review and reversal of the November 3, 2004 decision of the Department of Consumer and Regulatory Affairs (DCRA) to seek a variance from the Board of Zoning Adjustment rather than to grant the October 10, 2003 application of Appellant for a construction permit to make minor internal repairs and improvements to its solid waste transfer facility at 1315 First Street, S.E., Square 703, Lot 54 (the Facility). DCRA's decision was based on a clearly erroneous and arbitrary and capricious mischaracterization of the evidence before it. Once that factual inaccuracy is corrected it is clear that ETW should be permitted to make the requested changes and its permit application should be granted.

JURISDICTION OF BOARD OF ZONING ADJUSTMENT

2. The Board has jurisdiction over this appeal pursuant to D.C. Code § 5-424 (f).

BACKGROUND

The Facility

3. The Facility is located at 1315 First Street, S.E. Since at least the early 1990's it has operated as a solid waste transfer facility at that site. ETW possesses a Certificate of Occupancy (No. B 162503) issued on March 17, 1992 for the purposes of "Warehouse (Waste & Rec.)." For at least a decade while ETW was operating the Facility, it was zoned M for Industrial. According to the DCRA, the Zoning Commission rezoned the property to the CG/CR

zone district in October 2002. However, the Zoning Maps continue to show the Facility as within an M district.

The Construction Permit Application

4. After determining that it desired to make some minor internal repairs and improvements to the Facility, ETW on October 10, 2003, submitted to DCRA a construction permit application for these changes (the Application). The "Contract Agreement" with the vendor selected to perform the work (enclosed within the Application) described the work as: "Construction of weight scale replace/repair: weight scale, structural steel, roof, siding, concrete floor, overhead doors, bathroom, scale house." The cost estimate was $400,000. The environmental intake form stated that the project was solely an interior renovation with no change in the use or capacity of the structure being renovated.

5. ETW possesses the right to make all of the requested internal repairs and improvements because of the zoning status of the Facility when ETW commenced operations at the site and because of the nature of the proposed changes. Even if the zoning is changed to CG/CR the proposed changes are allowed without the requirement of a variance or exception.

6. The DCRA initially approved the Application for zoning purposes. Exhibit 1, at 1. However, on January 12, 2004, DCRA sent a letter to ETW which stated that "Based on a review of the building plans and associated application, and pursuant to the DC Environmental Policy Act, it has been determined that the proposed work is substantial, requiring the submission of an Environmental Impact Statement (EIS) to DCRA. Unless and until there is a finding of no adverse effect, or an adverse effect is identified but a determination is made that the public health, safety or welfare is not imminently and substantially endangered, DCRA cannot issue the building permit, as requested." Exhibit 2 hereto.

7. This request by DCRA was improper because, *inter alia*, the environmental intake form stated that the project was solely an interior renovation with no change in the use or capacity of the structure being renovated, and the D.C. government had not completed an EIS with regard to substantial revisions it was making to its solid waste transfer facilities at Fort Totten and Benning Road.

8. Nevertheless, in an effort to try to expedite the handling of the Application ETW on March 30, 2004 submitted an Environmental Impact Screening Form (EISF) to DCRA for the project. Exhibit 3 hereto. The EISF made it clear that "There is no 'major action' that will result in significant adverse environmental impacts either during the 'construction' or 'operation' phase of a 'project.'" Exhibit 3, at 1. The form further stated that "none of the proposed changes will 'substantially alter' the facility. They will not make any physical modification to the facility which will increase or decrease by more than 10% per year the facility's maximum annual capacity, as indicated in any applicable solid waste permit. Nor will the proposed changes in any way alter or modify the method by which the waste is processed or disposed, or increase the amount of any air pollutant not previously emitted." *Id.*

9. The EISF described the "Project Definition" as follows:

> "Construction of one weight scale: Install one new 50' weight scale in addition to existing scales. State, Federal Laws and Business procedures require that trucks entering and leaving this facility must be weighed. Scales can frequently get stuck, break or become unreliable. Currently, no back-up scale is causing many customer complaints. When a scale is not operational, back-up's occur and customers must endure long waiting times. The physical size of the building is a limited factor to any increase or growth in business operations. This additional scale is a responsible business decision, and has no potential to have any environmental impact."
>
> "Repair/Replace Existing Structural Steel: Due to the age, damage from snowstorm of 2002/2003, no engineering data and physical damage. The steel needs replacement."

"Existing Weight Scale: Due to age this scale is due for replacement. See picture number one."

"Existing Roof Structure: Due to age, damage from snowstorm of 2002/2003, a portion of the roof and sub-structure has failed requiring immediate replacement. See picture number two."

"Existing Siding: Due to age, damage from the snowstorm of 2002/2003, vehicular damage, mixed construction materials, replace approximately 212 linear feet of brick, metal, grates, masonry with material that matches the existing. . . "

"Existing Concrete Floor: Replace damaged existing concrete floor in limited area."

"Existing Overhead Doors: Existing doors are damaged/unsuitable/removed. Replacement is required."

"Existing Scalehouse and Bathrooms: Services need replacement. . . ."

10. The form concluded: "Permit Application #59B is for renovations to a small portion of the existing building with the exception of one new scale. . . . none of the work described above will result in significant environmental impacts. **The 'Construction Phase' will result in ten (10) +/- additional people with three to five vehicles on site. . . . The 'Operational Phase' will result in no change to existing operations.**" Exhibit 3, at 2 (emphasis added). The EISF further stated that "none of the proposed changes will 'substantially alter' the facility. They will not make any physical modification to the facility which will increase or decrease by more than 10% per year the facility's maximum annual capacity, as indicated in any applicable solid waste facility permit. Nor will the proposed changes in any way alter or modify the method by which the waste is processed or disposed, or increase the amount of any air pollutant not previously emitted." *Id.*

11. Despite the fact that ETW submitted the EISF on March 30, 2004, the DCRA has yet to issue a decision as to whether an EIS is necessary for the project.

DCRA's Referral to BZA for a Variance

12. On or about November 3, 2004, DCRA sent a letter to the BZA regarding the Application which stated as follows:

> Review of plans for the proposed alteration/repair and replacement of an existing non-conforming use as a "Warehouse, Waste and Recycling" structure at the above subject premises indicates that the Board of Zoning Adjustment approval is required as follows:
>
> > 1. Variance pursuant to Section 2002.4 to allow proposed enlargement to an existing non-conforming use as "warehouse – waste and recycling" structure and from Section 3202.5(b) for filing this project after the Zoning Commission made a decision on the amendment of the Commercial Residential CR Zone District Classification. (Section 3103.2)

Exhibit 4 hereto.

13. ETW did not obtain a copy of the November 3 letter until December 10, 2004.

The Office of Planning's Mischaracterization of the Scope of the Proposed Changes

14. DCRA's determination that a variance was needed in order to approve the requested changes apparently was based on internal memorandum from the D.C. Office of Planning to DCRA dated May 3, 2004. Exhibit 5 hereto. This memorandum, which was not provided to ETW at that time, concluded that work proposed in the Application "could result in **significant negative impacts on the area.**" Exhibit 5, at 1 (emphasis in original). However, this conclusion was clearly erroneous and arbitrary and capricious because it was based on the following mischaracterization of the language in the EISF:

> The Office of Planning notes that the application appears to be a full reconstruction of the facility. . . . After completion of the renovation project, approximately 10 new employees with between three to five additional vehicles will be added to the site. The proposed renovation project will substantially alter the facility.

Exhibit 5, at 1 (emphasis in original). This was a blatant mischaracterization of the record. The following chart compares what was stated in the EISF and what was stated by the Office of Planning:

ETW'S EISF:	**Office of Planning Internal Memo:**
"The 'Construction Phase' will result in ten (10) +/- additional people with three to five vehicles on site. . . . The 'Operational Phase' will result in no change to existing operations."	"the application appears to be a full reconstruction of the facility. . . . After completion of the renovation project, approximately 10 new employees with between three to five additional vehicles will be added to the site."

In sum, whereas ETW stated that its contractor would temporarily add approximately ten additional persons to complete the construction it made it clear that once construction terminated the changes would not result in the addition of a single employee at the Facility. However, in concluding that granting the Application "could result in significant impacts on the area" the DCRA erroneously determined that after construction ETW would add an additional ten employees.

15. It was clearly erroneous and arbitrary and capricious for the Office of Planning to base its recommendation to DCRA on such a fundamental misreading of the EISF, and it was equally erroneous and arbitrary and capricious for DCRA to rely on this mistake by the Office of Planning in deciding to refer this matter to BZA for a variance rather than to grant the Application.

16. Once the actual facts relating to the Application are acknowledged, the internal repairs and improvements contemplated in the Application should be permitted as a matter of right.

CONCLUSION

For the reasons set forth above, Appellant ETW requests that the Board reverse the decision of DCRA to seek a variance, and order the DCRA to grant the October 10, 2003 Application of Appellant for a construction permit.

Respectfully submitted:

Scope of the Project	Yes	No	Instructions
12 Is an exemption claimed from the requirement to submit an Environmental Impact Screening Form pursuant to Title 20, Sec. 7202 that is not referred to in this form? If yes, describe the exemption and cite the relevant section of the regulations on an attachment			If yes, describe on an attachment and submit to EIS Coordinator, DCRA.
13 Does the total cost of the project exceed $1 42 million, including site preparation and construction?			If yes, and no exemption claimed, Environmental Impact Screening Form (EISF) required. If no, indicate actual project cost _____
14 Is the cost of this project $1 42 million or less? If yes, please answer all of the following questions			If yes, complete A through G.
A Does the project site contain any species of plant or animal that is identified as threatened or endangered?			If yes, EISF required.
B Are any streams, lakes, ponds, springs or wetlands within 100 feet of the project site?			If yes, EISF required.
C Will the project result in an emission of odorous or other air pollutants from any source, including VOCs?			If yes, EISF required.
D Will this action involve the use, production or disposal of hazardous substances as defined in 20 DCMR 7299?			If yes, EISF required.
E Will construction be on land where the depth to the water table is less than 3 feet?			If yes, EISF required.
F Will blasting occur as part of the project?			If yes, EISF required.
G Will the project generate medical, infectious, radioactive or hazardous waste?			If yes, EISF required.

I certify that all of the statements on this application are true and complete to the best of my knowledge and belief. I agree to comply with all applicable laws and regulations of the District of Columbia. The making of false statements on this application is punishable by criminal penalties. (DC Code Sec. 22-2514)

Filed Job Application # (if applicable):	Project Description: Replace / Repair

Owner: Eastern Trans-Waste of Maryland Inc. Date: 9-4-03

Owner's address and phone #: 1315 1st St SE. Washington D.C. 20003

Authorized agent: Durable Steel Structures / Mark Reynolds

Address and Phone # of authorized agent: PO Box 403 Mankato Md. 21111

Scope of the Project	Yes	No	Instructions
1 Does the owner of this site own adjacent or abutting property?		✓	If yes, submit a site plan to EIS Coordinator, DCRA. If no plan exists, submit written explanation to EIS Coordinator, DCRA.
2 Does the owner of this site plan to acquire property that is adjacent to or abutting this site within the next three years?		✓	If yes, submit a site plan to EIS Coordinator, DCRA. If no plan exists, submit written explanation to EIS Coordinator, DCRA.
3 Is additional activity planned by the applicant for this site or any site within the same square during the next three years that requires a permit?		✓	If yes, submit a site plan to EIS Coordinator, DCRA. If no plan exists, submit written explanation to EIS Coordinator, DCRA.
4 Is this a residential project within the R-1 through R-5-A zoning districts?		✓	If yes, skip to signature line.
5 Is this project a single-family residence that is not in conjunction with the building of two or more units?		✓	If yes, skip to signature line.
6 Is this project an accessory structure such as a garage, patio, swimming pool or fence?		✓	If yes, skip to signature line.
7 Is the project solely an interior renovation with no change in the use or capacity of the structure being renovated?	✓		If yes, skip to signature line.
8 Is the project located in an Economic Development Zone, as defined in DC Code 5-1401 et seq (DC Law 7-177)?			If yes, skip to signature line.
9 Is the project located within the Central Employment Area as defined in DC Zoning Regulations? (Title 11DCMR)			If yes, skip to signature line.
10 Does the project involve only the operation, repair, maintenance, or minor alteration of public structures, facilities, mechanical equipment, or topographical features and involve negligible or no expansion of use beyond that previously existing?			If yes, skip to signature line.
11 Has an Environmental Impact Statement (EIS) been prepared pursuant to the National Environmental Policy Act of 1969 (NEPA), or a determination made that no EIS is needed, or has the functional equivalent of an EIS been prepared?			If yes, submit documentation to EIS Coordinator, DCRA.

DISTRICT OF COLUMBIA GOVERNMENT
OFFICE OF THE SURVEYOR

Washington, D.C., November 19, 2003

Plat for Building Permit of SQUARE 703 LOT 54

Scale: 1 inch = 40 feet Recorded in Book 187 Page 9

Receipt No. 06129

Furnished to: M. REYNOLDS

Surveyor, D.C.

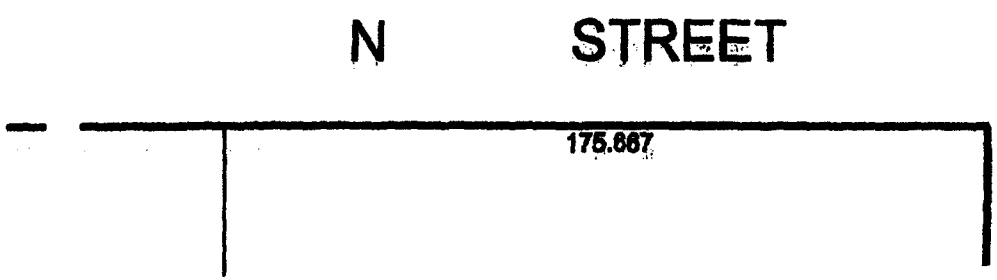

By: L.M.A.

I hereby certify that all existing improvements shown hereon, are completely dimensioned, and are correctly platted; that all proposed buildings or construction, or parts thereof, including covered porches, are correctly dimensioned and platted and agree with plans accompanying the application; that the foundation plans as shown hereon is drawn, and dimensioned accurately to the same scale as the property lines shown on this plat;and that by reason of the proposed improvements to be erected as shown hereon the size of any adjoining lot or premises is not decreased to an area less than is required by the Zoning Regulations for light and ventilation; and it is further certified and agreed that accessible parking area where required by the Zoning Regulations will be reserved in accordance with the Zoning Regulations, and that this area has been correctly drawn and dimensioned hereon. It is further agreed that the elevation of the accessible parking area with respect to the Highway Department approved curb and alley grade will not result in a rate of grade along centerline of driveway at any point on private property in excess of 20% for single-family dwellings or flats, or in excess of 12% at any point for other buildings. (The policy of the Highway Department permits a maximum driveway grade of 12% across the public parking and the private restricted property.)

GOVERNMENT OF THE DISTRICT OF COLUMBIA
DEPARTMENT OF CONSUMER AND REGULATORY AFFAIRS

Building and Land Regulation Administration
Office of the Administrator

D.C. RECEIVED
OFFICE OF ZONING
2004 DEC 21 PM 3:48

January 12, 2004

Robert Sochovka
Eastern Trans-Waste of Maryland Inc.
1315 First Street SE
Washington DC 20003

Dear Mr. Sochovka:

The Department of Consumer and Regulatory Affairs (DCRA) has reviewed your application for a building permit for 1315 First Street SE submitted on October 10, 2003. The application describes the existing use of the building as a waste and recycling warehouse.

The DC Environmental Policy Act (Title 8 DC Code 109.11) states that "...a full EIS shall be required for the construction of any new solid waste facility or the substantial modification of an existing structure presently used as, or intended to be used as, a solid waste facility, as the term "solid waste facility" is defined in Chapter 10 of Title 8, regardless of the cost or construction or modification "

Based on a review of the building plans and associated application, and pursuant to the DC Environmental Policy Act, it has been determined that the proposed work is substantial, requiring the submission of an Environmental Impact Statement (EIS) to DCRA. Unless and until there is a finding of no adverse effect, or an adverse effect is identified but a determination is made that the public health, safety or welfare is not imminently and substantially endangered, DCRA cannot issue the building permit, as requested.

The requirements and process for preparation and submission of an EIS are described in 20 DCMR, Chapter 72, 7208.1 (enclosed). You may call me at 442-4455 if you have any questions.

Sincerely,

Denzil Noble
Administrator

District of Columbia Register

MAY 9 - 1997

DEPARTMENT OF CONSUMER AND REGULATORY AFFAIRS

NOTICE OF FINAL RULEMAKING

The Director of the Department of Consumer and Regulatory Affairs, pursuant to § 10 of the District of Columbia Environmental Policy Act of 1989, D.C. Law 8-36, effective October 18, 1989, D.C. Code § 6-989, and Mayor's Order 92-151 (December 1, 1992) hereby gives notice of the adoption of the following new Chapter 72 ("Environmental Policy Act Regulations") of Title 20 DCMR, ("Environment"). These rules were adopted on July 11, 1995 and will implement the Environmental Policy Act.

On April 22, 1994, the Director of the Department of Consumer and Regulatory Affairs ("DCRA") published in the District of Columbia Register ("D.C. Register") for notice and comment proposed rules to implement the District of Columbia Environmental Policy Act of 1989, D.C. Law 8-36 (41 DCR 2251 (April 22, 1994))

Section 10 of Law 8-36 requires the Mayor to submit the proposed rules to the District of Columbia Council (the "Council") for review during a review period consisting of 45 days, excluding Saturdays, Sundays, legal holidays, and days of Council recess. (D.C. Code § 6-989(a) (1995)). In accordance with that requirement, the Mayor and DCRA submitted the proposed rules to the Council on October 15, 1994. Also submitted to the Council with the proposed rules was a report responding to citizens comments received in response to the April 22, 1994 Notice of Proposed Rulemaking. This report recommended several changes in the proposed rules, including changes to Sections 7201, 7202, 7203, 7205, 7206, 7209, and 7212. Section 10 of the Act further provides that "if the Council does not approve or disapprove the proposed rules, in whole or in part, by resolution within this 45-day review period, the proposed rules shall be deemed approved."

The Council took no action on the proposed rules or the recommended changes to the proposed rules, and by letter dated March 2, 1995, Council Chairman Clarke stated that by virtue of the Council having taken no action to disapprove it, Proposed Resolution PR10-724, entitled "District of Columbia Environmental Policy Act Proposed Rulemaking Approval Resolution of 1994", was deemed approved on February 18, 1995.

These final rules take effect immediately upon publication of this notice in the D.C. Register.

At the same time as the publication of this Notice of Final Rulemaking, DCRA is also publishing a Notice of Proposed Rulemaking which addresses citizen comments on the April 22, 1994 Proposed Rulemaking and proposes amendments to the sections listed above.

District of Columbia register MAY 9 - 1997

CHAPTER 72 ENVIRONMENTAL POLICY ACT REGULATIONS

7200 GENERAL PROVISIONS

7200.1 Before an agency, board, commission, or authority of the District of Columbia government shall approve any major action, or issue any lease, permit, license, certificate, or other entitlement or permission to act for a proposed major action, the environmental impact of the action must be adequately considered and reviewed by the District government, as provided in these regulations.

7200.2 Agencies, boards, and commissions under the Mayor's authority shall integrate, and agencies, boards and commissions not under the Mayor's authority shall be requested to integrate the Environmental Impact Statement (EIS) process with other planning processes at the earliest stages of their planning for major actions they intend to propose, when the widest range of feasible alternatives is open for consideration, and before there has been any irretrievable commitment of resources, in order to ensure that planning and decisions reflect environmental values, in order to avoid delays later in the process, and to head off potential conflicts.

7201 MAJOR ACTIONS FOR WHICH ENVIRONMENTAL IMPACT SCREENING FORMS ARE REQUIRED

7201.1 An Environmental Impact Screening Form (EISF) shall be prepared for any action that would cost over one million dollars ($1,000,000) based on 1989 dollars adjusted annually according to the Consumer Price Index and that may have a significant impact on the environment.

7201.2 An action costing $1 million or more may have significant impact on the environment and, thus, may be a major action subject to the EISF requirement of § 7201.1 if any of the following conditions are met:

(a) The action might have a significant adverse effect on a rare or endangered species of animal or plant, or the habitat of the species;

(b) The action might violate published national or local standards relating to hazardous waste, solid waste or litter control;

(c) The action might significantly deplete or degrade ground water resources;

(d) The action might significantly interfere with ground water recharge;

(e) The action might induce significant growth or concentration of population;

(f) The action might cause significant flooding, erosion or sedimentation;

(g) The action might extend a sewer trunk line with capacity to serve new development;

(h) The action might significantly diminish habitat for fish, wildlife or plants;

(i) The action might disrupt or divide the physical arrangement of an existing community;

(j) The action might create a potential public health hazard or would involve the use, production or disposal of materials that pose a hazard to people, animal or plant populations in the area;

(k) The action might violate any ambient air quality standard, contribute significantly to an existing or projected air quality violation, or expose sensitive receptors to significant pollutant concentration;

(l) The action might cause significant adverse change in existing surface water quality or quantity;

(m) The action might cause a significant adverse change in the use and conservation of energy resources, including an adverse impact on quantity or type of energy used;

(n) The action might cause significant adverse change in the existing level of noise in the vicinity of the action;

(o) The action might result in the exceedance of any Federal or District standards regarding electric and magnetic fields (EMF), if and when such standards are promulgated.

(p) The action, together with other actions proposed concurrently by the applicant, might have a cumulative impact that would be significant under the criteria described in § 7201.2(a)-(o).

MAY 9 - 1997

District of Columbia Register

7201.3 An EISF shall be prepared for any action that would cost less than 1 million dollars ($1,000,000) based on 1989 dollars adjusted annually according to the Consumer Price Index, if the action imminently and substantially affects the public health, safety, or welfare.

7201.4 A project imminently and substantially affects the public health, safety, or welfare if any of the following conditions are met:

(a) The action would violate Federal or District standards relating to hazardous waste, energy resources, air pollution, surface and ground water pollution, soil erosion, storm water, and flooding;

(b) The action would negatively affect a rare or endangered species of animal or plant, or the habitat of that species;

(c) The action would contaminate a public water supply;

(d) The action would create a public health hazard under applicable District regulations; or

(e) The action would involve the use, production or disposal in the affected area of hazardous substances as defined in § 7299.1 of these regulations in violation of federal or District environmental regulations.

7202 **ACTIONS FOR WHICH NO ENVIRONMENTAL IMPACT SCREENING FORM IS REQUIRED**

7202.1 No agency shall require that an EISF or an EIS be prepared for the following actions:

(a) Any action that costs less than 1 million dollars ($1,000,000) based on 1989 dollars adjusted annually according to the Consumer Price Index, unless that action meets the criteria of §§ 7201.3 and 7201.4 of these rules;

(b) Any action for which an Environmental Impact Statement ("EIS") has been prepared in accordance with the National Environmental Policy Act of 1969, approved January 1, 1970 (83 Stat. 852; 42 U.S.C. § 4321 et seq.) (NEPA) and its implementing regulations, or a determination has been made under NEPA and its implementing regulations that

no impact statement is required due to a finding of no significant impact or a finding that the proposed action is categorically excluded from consideration;

(c) Any action for which a request has been made for the authorization or allocation of funding that involves only a feasibility or a planning study for a possible future action that has not been approved, adopted or funded. The study, however, shall include consideration of environmental factors;

(d) Any action whose impact on the environment has been or is considered in the functional equivalent of an EIS, where equivalency is determined by the lead agency;

(e) Any action that reached a critical stage of completion prior to October 18, 1989, and the cost of altering or abandoning the action for environmental reasons outweighs the benefits derived from the action;

(f) Any action of an environmentally protective regulatory nature;

(g) Any actior within the Central Employment Area as defined in the Zoning Regulations of the District of Columbia; and

(h) Any action for which a lease, permit, certificate, or any other entitlement or permission to act by a District government agency has been approved before December 31, 1989.

7202.2 In addition to the actions listed in § 7202.1, no agency shall require that an EISF or EIS be prepared for the following classes of actions:

(a) Class 1. Operation, repair, maintenance, or minor alteration of existing public structures, facilities, mechanical equipment, or topographical features, including replacement of roofs, HVAC, electrical, plumbing, elevator, sprinkler or other systems, plus interior work to common areas and individual units, involving negligible or no expansion of use beyond that previously existing;

(b) Class 2. Replacement, renovation, or reconstruction of existing structures and facilities, where the new or renovated structure

meets the requirements of the Zoning Regulations, is located on the same site as the structure replaced, renovated, or reconstructed. will have substantially the same purpose and capacity as the structure replaced, renovated, or reconstructed, and will not exceed the density of that structure;

(c) Class 3. Construction and location of limited numbers of small facilities or structures; installation of new equipment in small structures, including replacement of HVAC, electrical, plumbing, elevator, sprinkler or other systems; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. This class includes, but is not limited to:

(1) Single family residences not in conjunction with the building of two or more such units;

(2) Small commercial structures not involving the use of significant amounts of hazardous substances;

(3) Water main, sewage, electrical, and other utility extensions of reasonable length to serve such construction; and

(4) Accessory structures such as garages, patios, swimming pools, and fences;

(d) Class 4. Minor public or private alterations in the condition of land, water, or vegetation which do not involve the removal of mature, healthy trees. This class includes, but is not limited to:

(1) Grading on land with a slope of less than ten percent (10%), except in waterways, wetlands, or officially designated scenic areas;

(2) New gardening, landscaping or planting of trees or other vegetation;

(3) Temporary use of land having negligible permanent effects, such as carnivals, fairs, and sales of Christmas trees; and

(4) The creation of bicycle lanes on existing rights-of-way;

(e) Class 5. Minor alterations in land use limitation in areas with an average slope of less than twenty percent (20%), which do not result in any changes in land use or density. This class includes, but is not limited to:

(1) Minor lot line adjustments, side yard and set back variances; and

(2) Issuance of minor encroachment permits;

(f) Class 6. Actions taken by District agencies as authorized by law or regulation to assure the maintenance, restoration, or enhancement of a natural resource or the environment, where the regulatory process involves procedures for protection of the environment. This includes basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to the environment and activities limited entirely to inspections to check for performance of an operation, or the quality, health or safety of a project;

(g) Class 7. Construction or placement of minor structures accessory to existing commercial, industrial, or institutional facilities. This class includes, but is not limited to:

(1) On-premise signs;

(2) Small parking lots (fewer than 50 vehicles); and

(3) Placement of seasonal or temporary use items such as mobile food units, portable restrooms, or similar items in generally the same locations from time to time in publicly owned parks, stadiums, or other facilities designed for public use;

(h) Class 8. Action in the nature of a response to an emergency as determined by the Mayor;

(i) Class 9. Action in the nature of remedial actions related to leaking underground storage tanks, removal of PCB equipment, hazardous substances, or other environmental contaminants pursuant to all lawfully required and issued permits;

(j) Class 10. Actions related to the removal of asbestos pursuant to all lawfully required and issued permits;

(k) Class 11. Residential structure projects, or portions of projects, within the R-1 through R-5-A zoning districts, as defined under Chapters 2 and 3 of Title 11, DCMR (Zoning);

(l) Class 12. Actions within Development Zones as defined pursuant to the District of Columbia Economic Development Zone Incentives Act of 1988 (D.C. Law 7-177).

7202.3 An applicant may submit an existing environmental description and analysis of a proposed action to the lead agency, which must make a written determination within thirty (30) days of receipt of the document as to whether or not (i) the environmental description and analysis qualifies as a functional equivalent of an EIS, and (ii) the action is exempt under § 7202.1.

7203 **DESIGNATION AND RESPONSIBILITIES OF LEAD AND REVIEW AGENCIES**

7203.1 The lead agency responsible for the coordination of the preparation and review of the EISF, and the EIS if necessary, shall be as follows:

(a) For any major action proposed by an applicant that would require any license, permit, certificate of occupancy or other approval from a District Agency prior to implementation, the District agency responsible for the first District government authorization of the project shall be the lead agency;

(b) For any major action proposed by the District government, the agency proposing the project shall be the lead agency.

7203.2 For any public or private major action for which the lead agency is an agency other than DCRA, the lead agency shall submit any EISF and EIS to the DCRA, as review agency, for review, and shall consider the recommendations of DCRA in determining whether to request additional information on environmental impacts pursuant to § 7203.4 and in decisions concerning the major action that is the subject of the EISF or EIS.

7203.3 DCRA shall submit its recommendations concerning the need for an EIS to the lead agency within fourteen (14)

days of receipt of the submission of the EISF from the lead agency. DCRA shall submit its recommendations concerning any EIS to the lead agency by the end of the period for public comment on the EIS.

7203.4 The lead agency may request relevant information from the applicant concerning impact, costs, benefits, and alternatives that it reasonably determines to be necessary in evaluating the proposed major action. If the lead agency has not received any response to the request for information within ninety (90) calendar days, the lead agency shall deny approval of the project.

7203.5 For District government projects, DCRA may request relevant information from the lead agency concerning impact, costs, benefits, and alternatives that it reasonably determines to be necessary in evaluating the proposed major action. If DCRA has not received any response to the request for information within ninety (90) calendar days, DCRA shall deny approval of the project.

7203.6 No agency shall issue any license, permit, certificate, or authorization until completion of the environmental impact review process by the lead agency.

7204 PREPARATION OF ENVIRONMENTAL IMPACT SCREENING FORM

7204.1 The lead agency or the applicant shall complete an EISF for major actions that are not exempted by § 7202.1 or § 7202.2.

7204.2 The applicant for a permit for a major action shall file an EISF and five (5) copies with the lead agency for review and determination of whether an EIS is required.

7204.3 Along with the EISF, the applicant shall submit a project description and any other available information relative to the environmental impacts of the proposed major action, including, but not limited to, environmental assessments, traffic analyses, computer analyses and any other reports which will assist the lead agency in making its determination.

7204.4 Upon the request of the lead agency, the applicant shall provide any additional information requested to complete or clarify the description of the proposed major action and potential environmental impacts. If the applicant has not responded to the request for

information within ninety (90) calendar days, the lead agency shall deny approval of the project.

7205 REVIEW OF ENVIRONMENTAL IMPACT SCREENING FORM

7205.1 The lead agency shall make a written determination, within thirty (30) working days of the submission by an applicant of a complete EISF pursuant to §§ 7204.2 and 7204.3 for a major action that is not exempt under § 7202.1 or 7202.2, whether or not the action is likely to have substantial negative impact on the environment, and whether an EIS is required.

7205.2 If the lead agency determines that an EIS is required, no lease, permit, license, certificate, or other entitlement shall be issued by the District government until the EIS has been prepared consistent with these regulations and the Environmental Policy Act, has been reviewed and approved by the District government, and all applicable fees have been paid.

7205.3 If the lead agency determines that an EIS is not required for a major action that is likely to involve the creation, use, storage, transportation, or disposal of a hazardous substance, the lead agency shall prepare within ten (10) days of such determination, a written explanation of why an EIS is not required.

7205.4 The lead agency shall make the written determination required by § 7205.3 available to the public by publishing a notice in the D.C. Register and transmit a copy to the Council of the District of Columbia prior to granting or issuing of any applicable lease, permit, license, certificate, entitlement, or permission to act.

7206 PREPARATION OF THE ENVIRONMENTAL IMPACT STATEMENT

7206.1 For major actions proposed by an applicant, the applicant shall be responsible for the preparation of the EIS.

7206.2 The EIS shall include the following information and will describe and, where appropriate, analyze the following:

(a) The goals and nature of the proposed major action and its environment;

(b) The relationship of the proposed major action to the goals of the adopted Comprehensive Plan, requirements as promulgated by the Zoning

Commission, And any District or federal environmental standards;

(c) Any adverse environmental impact that cannot be avoided if the proposed major action is implemented;

(d) Alternatives to the proposed major action, including alternative locations and the adverse and beneficial effects of the alternatives;

(e) Any irreversible or irretrievable commitment of resources involved in the implementation of the proposed major action;

(f) Mitigation measures proposed to minimize any adverse environmental impact;

(g) The impact of the proposed major action on the use of energy resources, if applicable and significant;

(h) The cumulative impact of the major action when considered in conjunction with other proposed actions;

(i) The environmental effect of future expansion or action, if expansion or action is a reasonably foreseeable consequence of the initial major action and the future expansion or action will likely change the scope or nature of the initial major action or its environmental effects;

(j) Responses to comments on the EIS provided by the Council, any affected Advisory Neighborhood Commission, and interested members of the public; and

(k) Any additional information that the Mayor or a board, commission, or authority determines to be helpful in assessing the environmental impact of any proposed major action and the suggested alternatives.

7206.3 For any given major action covered by this chapter, only one EIS shall be required.

7207 RESERVED

7208 PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENTS

7208.1 The lead agency shall transmit a copy of the completed EIS to the Council of the District of Columbia, any District agency that has responsibility for implementing the major action or that has special expertise with respect to any environmental impact involved, and any affected Advisory Neighborhood Commission.

7208.2 The lead agency shall publish in the D.C. Register a notice of the availability of the EIS for a forty-five day (45) public comment period.

7208.3 The lead agency shall make available to the public for inspection a copy of the EIS, by providing a copy of the EIS in its main office and in the M.L. King Public Library.

7209 PUBLIC HEARING REQUIREMENT

7209.1 The lead agency shall hold a public hearing on an EIS within forty-five (45) calendar days of any request made during the public comment period by twenty-five (25) registered voters in a single member district, or if there is significant public interest in the action that is the subject of the EIS.

7209.2 The hearing shall provide an opportunity for the citizens affected by the environmental impacts of the proposed major action and other interested parties to present written and oral comments.

7209.3 The applicant shall be given an opportunity to respond to all verbal or written public comments. Comments shall be addressed both individually and collectively and shall be responded to by:

(a) Supplementing, improving or modifying the analyses in the original EIS;

(b) Making factual corrections to the original EIS;

(c) Explaining why the comments do not warrant further response, by citing the sources, authorities, or reasons which support the position, and if appropriate, indicating those circumstances which would trigger agency reappraisal or further response; and

(d) By attaching to the response all comments received, whether or not the comment is thought to merit individual discussion and response.

7209.4 All written and oral comments, and responses to those comments, become part of the record and shall be considered by the lead agency in deciding whether the EIS identifies an adverse effect and that the public health, safety or welfare is imminently and substantially endangered by the action.

7210 FINDING AS TO ENVIRONMENTAL IMPACT

7210.1 The lead agency shall make a written finding, taking into account written and oral public comments, and the responses to those comments, that the EIS either:

(a) Identifies no adverse effect;

(b) Identifies an adverse effect, but the public health, safety, or welfare is not imminently and substantially endangered; or

(c) Identifies an adverse effect and the public health, safety, or welfare is imminently and substantially endangered.

7210.2 The lead agency shall make a finding as to the environmental impact of the proposed major action within thirty (30) working days after completion of a public hearing, if one is required, or within thirty (30) working days of the close of the public comment period, if no public hearing is required.

7210.3 If the lead agency makes a finding that the EIS identifies an adverse effect and that the public health, safety, or welfare is imminently and substantially endangered, the lead agency shall disapprove the project unless the lead agency or applicant submits mitigating measures or substitutes a reasonable alternative to avoid the danger.

7210.4 If the lead agency makes a finding that the final EIS identifies no adverse effect, or identifies an adverse effect and the public health safety or welfare is not imminently and substantially endangered, the proposed action shall be approved with respect to the requirements of Law 8-36.

7210.5 The lead agency's written finding shall be published in the D.C. Register.

7211 REQUIREMENTS FOR A SUPPLEMENTAL EIS

7211.1 The lead agency or applicant shall prepare a supplemental EIS if:

(a) The lead agency or applicant makes or proposes a substantial change in the proposed major action that is relevant to environmental concerns and not addressed in the EIS;

(b) There are significant new circumstances or information relevant to environmental concerns that affect the proposed action or the impact of the proposed action; or

(c) The lead agency determines for any action exempted from the EIS process pursuant to § 7202.1(b) (an action subject to the federal EIS requirements under NEPA), or § 7202.1(d) (an action for which a EIS functional equivalent has been prepared), that a substantial and relevant question remains with regard to the impact of the action on the environment that would otherwise be addressed in an EIS prepared in accordance with these regulations.

7211.2 The supplemental EIS shall be prepared, transmitted, funded and reviewed in accordance with the requirements of §§ 7206.1, 7206.3, 7208, 7209 and 7210.

7212 FEES

7212.1 The lead agency shall charge the applicant a fee for the review of the EIS.

7212.2 The EIS review fee is forty dollars ($40) per hour.

7212.3 For any EIS, the total review fee shall not exceed one percent (1.0%) of the total project cost of the proposed major action.

7213 PROJECT COSTS

7213.1 The total project cost of a proposed action shall include the cost of supplying utility service to the project, the cost of site preparation, the cost of labor and material, the cost of any process equipment required by the project, and the cost of installation of any process equipment.

7213.2 The cost of site preparation shall include both pre- and post-construction site work, including clearing of trees and vegetation, grading and excavation, implementation of soil erosion and sedimentation control plans, installation of storm water management facilities, and the post-construction replacement of trees and vegetation and other landscaping.

7213.3 Site preparation costs shall not include the costs of any remediation actions taken to remove contaminated soils or to treat contaminated soils or ground water on site.

7299 DEFINITIONS

7299.1 When used in this chapter of this title, the following terms shall have the meanings ascribed:

Act - The District of Columbia Environmental Policy Act of 1989 (34 DCMR 5741).

Action - (i) a new project or activity directly undertaken by an agency, board, commission, or authority of the District government, or (ii) a project or activity that involves the issuance of a lease, permit, license, certificate, or other entitlement, or permission to act by an agency of the District government.

Adverse effects - any effect from a proposed action which has a significant negative environmental impact on the public health, safety, or welfare.

Affected ANC - the ANC within which the proposed action will be implemented and ANCs directly adjacent to that ANC.

ANC - Advisory Neighborhood Commission

Applicant - non-governmental party, institution, or corporation which applies to the District of Columbia government for a lease, permit, license, certificate, or other entitlement or permission to act.

Council - the Council of the District of Columbia

Critical stage - that phase of a proposed action where the cost of altering or abandoning the action outweighs the benefits to the environment.

DCRA - the District of Columbia Department of Consumer and Regulatory Affairs.

District of Columbia Register MAY 9 - 1997

EISF - Environmental Impact Screening Form

EIS - Environmental Impact Statement

Emergency - any immediate threat to the public health, safety, or welfare, or the quality of the environment for which an immediate response is required by the public or private sector.

Environment - the physical conditions that will be affected by a proposed action, including but not limited to, the land, air, water, minerals, flora, and fauna.

Functional Equivalent - the full and adequate description and analysis of the environmental impact of a proposed action by an agency, board, commission, or authority of the District government that examines or imposes environmental controls under procedures that provide for notice, opportunity for public comment, and the creation of a reviewable record, where the description and analysis discusses impacts on the environment, as defined in these regulations, and includes information concerning, at a minimum, (1) the relationship of the proposed action to any applicable District or federal environmental standards; (2) any potential unavoidable adverse environmental impact from the project, if implemented; (3) any irreversible and irretrievable commitment of resources involved in the implementation of the project; (4) any significant impact on the use and conservation of energy resources; and (5) the cumulative impact of the project on the environment when considered in conjunction with other actions proposed concurrently by the applicant.

Hazardous substance - any solid, liquid, gaseous, or semisolid form or combination that, because of its nature, concentration, physical, chemical, or infectious characteristic, as established by the agency, may:

(a) Cause or significantly contribute to an increase in mortality or an increase in a serious irreversible or incapacitating reversible illness; or

(b) Pose a substantial hazard to human health or the environment if improperly treated, stored, transported, disposed of, or otherwise managed, including substances that are toxic, carcinogenic, flammable, irritants, strong sensitizers, or that

District of Columbia Register MAY 9 - 1997

generate pressure through decomposition, heat, or other means, and containers and receptacles previously used in the transportation, storage, use, or application of hazardous substances.

Lead agency - the District government agency designated by the Mayor to have primary responsibility for coordinating the preparation of an Environmental Impact Statement.

Major Action - any action that costs over 1 million dollars and that under § 7201.2 may have a significant impact on the environment, or any action that costs less than 1 million dollars and that under § 7201.4 imminently and substantially affects the public health, safety, or welfare.

Public Structure - any government-owned building, roadway, bridge, alley, sidewalk, curb, gutter, or utility, including structures and equipment related to the pumping or distribution of water, sanitary sewage, storm water, or combination of storm water and sanitary sewage.

Review Agency - the Department of Consumer and Regulatory Affairs (DCRA).

Significant - the degree to which an action has a major impact on public health, safety, or welfare, or the quality of the environment.

Significant Negative Impact - any impact, which when considered in its entirety will result in a significant degradation of the environment.

ENVIROMENTAL IMPACT SCREENING FORM (E.I.S.F.)

PREPARED BY:
MARK REYNOLDS
DURABLE STEEL STRUCTURES
March 30, 2004

This form and information is provided at the request of Ms. Lorraine Bennett, and Mr. Denzil Noble of the D.C. Department of Consumer and Regulatory Affairs. There is no "major action" that will result in significant adverse environmental impacts either during the "construction" or "operation" phase of a "project". The following is provided as conclusive documentation in this matter. Please release permit application #59B.

In addition, none of the proposed changes will "substantially alter" the facility. They will not make any physical modification to the facility which will increase or decrease by more than 10% per year the facility's maximum annual capacity, as indicated in any applicable solid waste facility permit. Nor will the proposed changes in any way alter or modify the method by which the waste is processed or disposed, or increase the amount of any air pollutant not previously emitted.

Project Definition
As listed on Permit Application #59B

Construction of one weight scale; Replace/Repair; Structural Steel, Weight Scale, Roof, Siding, Concrete Floor, Overhead Doors, Scalehouse and Bathrooms.

- **Construction of one weight scale**: Install one new 50' weight scale in addition to existing scales. State, Federal Laws and Business procedures require that trucks entering and leaving this facility must be weighed. Scales can frequently get stuck, break or become unreliable. Currently, no back-up scale is causing many customer complaints. When a scale is not operational, back-up's occur and customers must endure long waiting times. The physical size of the building is a limiting factor to any increase or growth in business operations. This additional scale is a responsible business decision, and has no potential to have any environmental impact.

- **Replace/Repair Existing Structural Steel**: Due to the age, damage from snowstorm of 2002/2003, no engineering data and physical damage. The steel needs replacement.

- **Existing Weight Scale**: Due to age this scale is due for replacement. See picture number one.

- **Existing Roof Structure**: Due to age, damage from snowstorm of 2002/2003, a portion of the roof and sub-structure has failed requiring immediate replacement. See picture number two.

- **Existing Siding**: Due to age, damage from the snowstorm of 2002/2003, vehicular damage, mixed construction materials, replace approximately 212 linear feet of brick, metal, grates, masonry with material that matches the existing. See pictures three and four.

- **Existing Concrete Floor**: Replace damaged existing concrete floor in limited area.

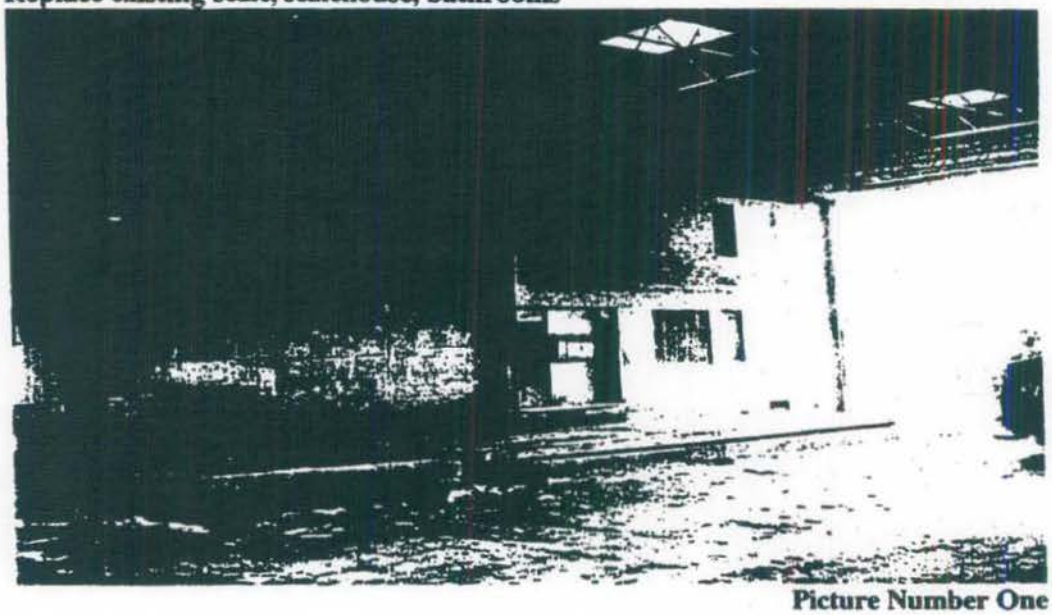

- **Existing Overhead Doors**: Existing doors are damaged/unusable/removed. Replacement is required.

- **Existing Scalehouse and Bathrooms**: Services need replacement. See picture number one.

In conclusion, Permit Application #59B is for renovations to a small portion of the existing building with the exception of one new scale. To answer the first paragraph of the EISF none of the work described above will result in significant adverse environmental impacts. The **"Construction Phase"** will result in ten (10) +/- additional people with three to five vehicles on site. Delivery of construction materials will be minimal, approximate average of two deliveries per day. The **"Operational Phase"** will result in no change to existing operations.

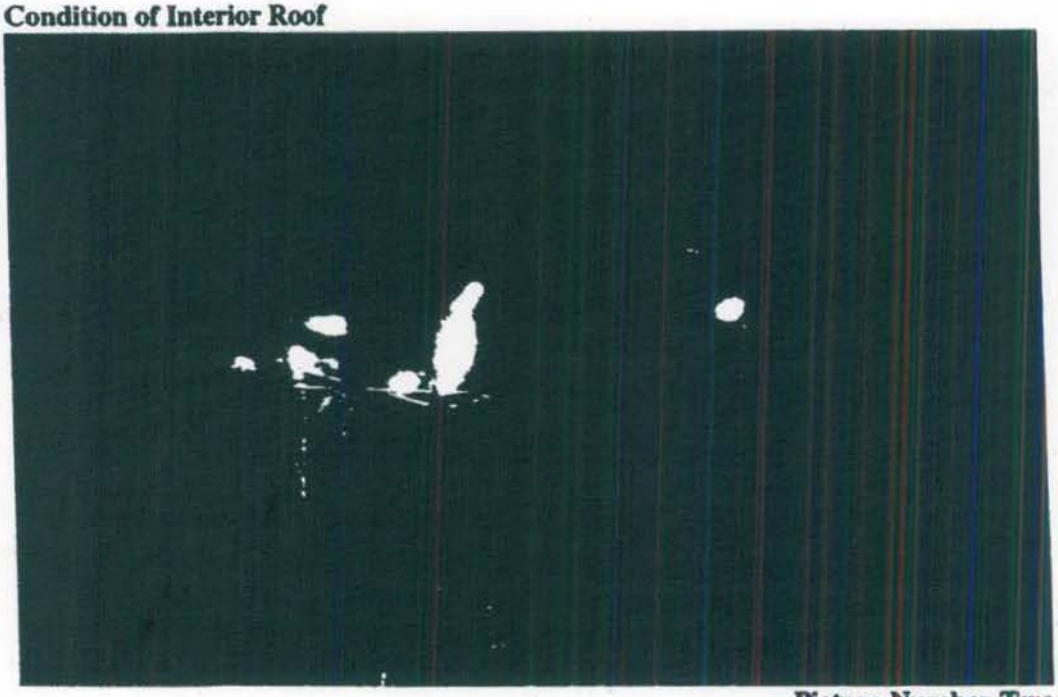

In addition, none of the proposed changes will "substantially alter" the facility. They will not make any physical modification to the facility which will increase or decrease by more than 10% per year the facility's maximum annual capacity, as indicated in any applicable solid waste facility permit. Nor will the proposed changes in any way alter or modify the method by which the waste is processed or disposed, or increase the amount of any air pollutant not previously emitted.

Replace existing scale, scalehouse, bathrooms

ENVIRONMENTAL IMPACT SCREENING FORM (EISF)

The Environmental Impact Screening Form (EISF) is designed to help applicants and District government agencies to determine whether or not a major action, as defined in DC Law 8-36, (District of Columbia Environmental Policy Act of 1989), would likely result in significant adverse environmental impacts, either during the construction or operational phase of a project. The EISF review process provides an orderly and comprehensive procedure that permits the introduction of information that is tailored to the specific project or actions proposed. **Please note that, pursuant to the Environmental Policy Act Regulations (Chapter 72, Title 20 DCMR), no agency is permitted to issue a license, permit, certificate or authorization until the environmental impact review process is completed.**

The Department of Consumer and Regulatory Affairs will transmit your EISF and supporting documents to other agencies for their review, including the Department of Health, the Department of Public Works, the Office of Planning and the DC Water and Sewer Authority. To expedite review of your submission, it is important that the information you provide is as complete and comprehensive as possible.

In addition to the EISF, your submission must include:

1. 19 copies of a vicinity map of approximately a one-mile radius, showing neighborhood names, institutional uses, shopping centers, fire and police stations, metro stations, parks and public space.
2. One copy of a site plan (24" x 36") showing existing conditions, with a narrative that describes existing topographic and drainage conditions, including location and names of any wetlands, streams and water courses on and/or adjacent to the property.
3. 19 copies of a detailed site plan..
4. One copy of a separate plan (24" x 36") showing conceptual erosion and sediment control measures for the project, including proposed grading and total square footage of disturbed earth.
5. One copy of a separate plan (24" x 36") showing conceptual storm water management measures and their location(s), including drainage layout. No storm water management computations are required for this initial phase. N/A Project Will Not Alter or Change Existing Conditions.
6. 19 copies of a brief written summary of the project (one page is sufficient)

You may attach additional information that will assist you to accurately describe your project. This information could be in the form of a narrative description of the project, brochures describing the project or processing equipment, geotechnical reports, soil surveys, phase one and phase two environmental assessments, traffic surveys, air quality analyses, or any other information, which may assist reviewing agencies.

Submit 19 copies of the completed EISF and supporting documents to the Department of Consumer and Regulatory Affairs (DCRA), Building and Land Regulation Administration (BLRA). Do not submit bound documents. **Unsigned submissions will not be accepted.**

Each applicant will be notified regarding DCRA's findings within 30 business days of receipt of an EISF, unless additional information has been requested by a reviewing agency. DCRA's findings will indicate whether or not the proposed project is likely to have substantial negative impact on the community, and whether or not an Environmental Impact Statement (EIS) is required.

I. PROJECT INFORMATION

Name of Project: EASTERN TRANS WASTE OF MARYLAND, INC.		
Location of Project (Street Address) 20003: 1315 1ST STREET, S.E. WASHINGTON DC.	Lot: 54	Square: 703
Name of Applicant: MARK REYNOLDS	Telephone: (410) 239-3000	
Email Address: MREYNOLDS@DURABLESTEEL.COM	Fax: 410·374·1624	
Mailing Address: P.O. BOX 403		
City: MONKTON	State: MARYLAND	Zip: 21111
Name of Authorized Agent: MARK REYNOLDS	Telephone: (410) 239·3000	Fax: (410) 374-1624
Mailing Address: P.O. BOX 403		
City: MONKTON	State: MARYLAND	Zip: 21111
Name of Owner: EASTERN TRANS WASTE OF MARYLAND, INC	Telephone	Fax
Mailing Address: 1315 1ST STREET, S.E.		
City: WASHINGTON	State: D.C.	Zip: 20003

Please complete each question – indicate N/A if not applicable

II. EXISTING CONDITIONS

1. Present land use:
   a. Industrial X
      Commercial ___
      Residential ___
      Public/Institutional ___
      Other ___
   b. Percent of impervious area 100 %
   c. Floor Area Ratio 1.0 Gross Floor Area 53680 +/- Building Height 40' +/-
   d. Number and type of dwelling units ONE
2. What is the current zoning classification of the site? INDUSTRIAL
3. Have any zoning conditions been placed on the site? NO If yes, cite case number ___
4. What are the predominant land uses and zoning classifications within a ¼ mile radius of the project site? INDUSTRIAL
5. Total size of project land area: 53,680 +/- (square feet/acres)
6. What is the predominant soil type on the project site? 100% CONCRETE PAVEMENT / N/A
7. Is there any contaminated soil within the project limits? Yes ___ No X
8. What is the Federal Emergency Management Administration (FEMA) flood designation for the project? ZONE C - AREA OF MINIMAL FLOODING, PANEL NO. 110001 0030B, MAP DATE 11-15-1985

9. Approximate percentage of slopes on project site:
   0-10% X
   11-15% _____
   greater than 15% _____

10. List all adjacent properties with description of current use of each:
ABC Salvage Recycling; Barrell Recycling Company; Bus Parking Lot
See Pictures Five and Six

11. List any adjacent properties or buildings that are listed on the National Register of Historic Places:
N/A - None

12. What is the depth of the water table in feet at the project site, if known? Not known
Provide source of data (e.g. soil boring on-site monitoring well data on adjacent property, etc.)

13. Does the project site contain any species of plant or animal that is identified as threatened or endangered? Yes _____ No X if yes, identify each species _____

14. Are any streams within 100 feet of the project site? Yes _____ No X If yes, name the stream and the river to which it is a tributary _____

15. Are any lakes, ponds, springs or wetlands within 100 feet of the project site? Yes _____ No X If yes, provide name and size

16. Is the site served by existing public utilities? Gas X Electric X Water X Sanitary Sewer X Storm Sewer X
Combined Sewer _____

17. Do you plan to connect to existing water, sanitary, storm and combined sewers? If so, what size?
No, all utilities are existing

18. What are the existing average and peak sewage flows generated by the existing facilities? * (GPM) - Very little - 1 Bathroom
* Unknown. Water meter has been inoperable. Awaiting this permit to repair.

19. What are the distances from the property line to the public water, sanitary, storm and combined sewers?
Twenty feet +/-

20. Has the site ever been used as a landfill, construction fill or for the disposal of solid waste?
Yes _____ No X

21. What are the pre-development peak storm water runoff flows for a 2-year and 15-year storm event?
N/A - no new development proposed

III. PROJECT DESCRIPTION

1. Proposed land use:
   Industrial X
   Commercial ___
   Residential ___
   Public/Institutional ___
   Other _____

2. Project area to be developed: None (sq. ft./acres)
   Project area to remain undeveloped: _____ (sq. ft./acres)
   Dimensions of proposed structure: height _____ width _____ length _____
   Gross floor area of proposed structure: _____ sq. ft.
   Depth of any excavation: average _____ (ft) maximum _____ (ft)
   Percent of impervious cover after development _____ %

3. Does the proposed action require a planning or zoning decision? Yes____ No X
   If yes, indicate decision required:
   - Zoning variance ____
   - Special exception ____
   - Special use permit ____
   - Subdivision large tract review ____
   - Historic Preservation Review Board ____
   - Other ____

4. Number and type of dwelling units, if any: NONE

5. If commercial, office or institutional use, the number of employees N/A - INDUSTRIAL

6. Provide the modal split of residents, employees and daily customers/visitors (i.e., how many would be expected to arrive by automobile/mass transit/walking/bicycle) PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS.

7. Provide the estimated number of peak hour morning (6:30 AM – 9:30 AM) and evening (4:30 PM – 6:30 PM) vehicular trips into and out of the property PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS

7. Provide the location of parking entry, drop off areas and pedestrian entry PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS.

8. Cite the number of daily deliveries by truck, if any, and location of loading area, if any PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS

9. Will the proposed project contain residential premises, apartment dwellings, a subdivision or other housing complex designed to house 50 or more families? Yes ____ No X

10. Will the proposed project provide 50 or more new parking spaces? Yes ____ No X

11. Will the proposed project consist of shopping and /or commercial facilities having 50,000 or more square feet of gross floor space? Yes____ No X

12. Will the proposed project consist of entertainment and /or recreational facilities, including but not limited to theaters, auditorium, sports stadiums, bowling alleys, etc. having the capacity to accommodate more than 400 persons at one time? Yes ____ No X

14. Will the proposed project increase traffic volume, which would result in a street volume – to capacity ratio? of 0.90, or greater (Street Level-of- Service E or F)? Yes ____ No X

15. Will the proposed project increase traffic volume that would result in a vehicle delay of 55 or more? seconds at any signalized intersection? (Intersection Level- of – Service E or F) Yes ____ No X

NOTE: *If you answered yes to any of questions 10 through 15, you are required to submit three copies of an air quality analysis of emissions (in pounds or tons of pollutants per day) of Carbon Monoxide (CO), volatile organic compounds (VOCs), and nitrogen oxide (NOx) resulting from the operation of mobile sources associated with the proposed project. The most current version of the U.S. Environmental Protection Agency's (EPA's) " MOBILE " emission factor model must be used in deriving the emission estimates. In addition, an analysis of the impact from mobile sources on CO concentrations (in parts per million) in the vicinity of the proposed project must also be provided. This analysis, at a minimum, must be conducted in accordance with the procedures identified in the Department of Health's "Guidance on the Review of Air Quality Studies Performed as a Result of the EISF" using an approved dispersion model (the default model is the latest version of CALQCHR3 posted on the EPA regulatory model website) and must include a comparison of the resulting air quality of the resulting air quality with both the one (1) hour average and eight (8) hour average National Ambient Air Quality Standards (NAAQS) for CO.*

16. Will the proposed project result in an emission into the atmosphere of odorous or other air pollutants from any source, in any quality and of any characteristic and duration which is or is likely to be injurious to the public health or welfare, or which interferes with the reasonable enjoyment of life and property?
    Yes ___ No X if yes, describe: ____

17. How much natural material (rock, earth, etc.) will be removed from the site? Ø (tons/cubic yards)

18. How much vegetation will be removed from the site? Ø (sq. ft./acres)

19. Will any mature trees or other locally important vegetation be removed from the site? Yes ____ No X

20. Will construction be on land where the depth to the water table is less than 3 feet? Yes ____ No X

21. What are the projected average and peak sewage flows to be generated by this project? PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS.
22. What water demand for peak domestic and peak fire protection will result from this project?
PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS.

23. What are the peak storm flows for a 2-year and 15-year event that will result from this project?
PROJECT WILL NOT ALTER OR CHANGE EXISTING CONDITIONS.

24. Will pumping of ground water be required at the site during and/or after the project is completed?
Yes____ No X
    a. If yes, explain the purpose (e.g. sump for dewatering; continuous for industrial use)
    b. The expected pumping rate is _____ gallons per day

25. Will construction be on land where the bedrock is exposed or is within 3 feet of the existing ground surface? Yes ____ No X

26. Will the construction disturb more than 5,000 square feet of soil? Yes____ No X

27. Will contaminated soil be disturbed by the construction of pipelines? Yes ____ No X

28. Will the disturbed area be reclaimed? Yes ____ No X
    a. If yes, for what intended purpose is the site being reclaimed? _____

29. If the project is single-phased, provide the length of construction: 6 months (including demolition)

30. If the project is multi-phased: NO
    a. Total number of phases anticipated: _____
    b. Anticipated date of commencement of Phase1: month _____ year _____
    c. Anticipated date of completion of final phase: month _____ year _____
    d. Is Phase 1 functionally dependent on subsequent phases? Yes ____ No ____

31. Will blasting occur during construction? Yes ____ No X

32. Will the surface area of an existing water body be increased or decreased by the project?
Yes ____ No X If yes, explain_____

33. Will the proposed project interfere with ground water recharge? Yes ____ No X

34. Will the proposed project adversely affect existing surface water quality? Yes ____ No X

35. Is the project or any portion of the project in a 100-year flood plain? Yes ____ No X

36. Will liquid waste be generated, either during construction or afterwards? Yes ____ No X
    a. If yes, indicate type of waste (chemical, industrial, sewage, etc.) and amount:
    b. How will this waste be disposed of?

37. Will the project generate solid, medical, infectious, radioactive or other hazardous waste? Yes X No__
    a. If yes, what is the type and amount per month?
       type: Construction Debris
       amount: 50 Tons Total
    b. Will any existing waste disposal facility be used? Yes X No ____
       name of facility Eastern Plains Waste
       location: 1315 First St. SE
    c. Will any waste not go into a waste disposal facility? Yes X No ____
       If Yes, explain Metal To Scrap Recycler

38. Will the project produce odors? Yes ____ No X
    If yes, describe source of odor and duration _____

39. Will the project produce noise during construction that is above the allowable level (80db)? Yes ____ No X

40. Will the operating noise level exceed the allowable decibel level for that zone? Yes ____ No X

41. Will a pile driver be used during construction? Yes ____ No X

42. Where will the A/C unit be located? N/A

43. Will the project operation maintain an emergency generator? Yes ____ No X If yes, where will the generator be located?

44. Where will other motor driven equipment be located? N/A

45. Will the project operation have frequent deliveries by large vehicles? Yes ____ No X

46. Will any underground storage tanks be installed? Yes X No ____
    a. If yes, how many tanks will be installed? ONE
    b. Contents: EMERGENCY CONTAINMENT OF ANY LIQUID SPILLS
    c. Capacity: 1,000- (gallons)

47. Will pesticides (herbicides, insecticide, etc.) be used? Yes ____ No X If yes, indicate the type of pesticide and provide the name of the licensed applicator who will apply the pesticide

48. Will any other substancesithat will adversely change existing surface and ground water quality be handled at the site either during or after construction? Yes ____ No X If yes, attach pollution prevention plan.

49. Will the proposed project require the issuance of any permits or other approvals (Certificate of Occupancy, Public Space Permit, Raze Permit, Air Pollution Permit, Storm water Management Permit, Pretreatment Permit, etc.) from the District Government in addition to a Building Permit? Yes ____ No X If yes, list all required permits:

50. Will the proposed project require the issuance of any permits or other approvals (NPDES, Section 404 Degree and Fill Permit, etc.) from the Federal Government? Yes ____ No X
    If yes, list all required permits:

51. How will solid waste (trash, garbage, debris) generated by occupants of the project be managed? N/A

52. How will recyclable materials generated by occupants of the project be managed? N/A

53. What plans will be implemented to maintain the abutting public space free of litter and debris during construction and post-occupancy? DAILY PERSONNEL MONITORING

IV. VERIFICATION

I certify that all of the statements on this application are true and complete to the best of my knowledge and belief. I agree to comply with all applicable laws and regulations of the District of Columbia. The making of false statements on this application is punishable by criminal penalties (DC Code Ann. Sec. 22-2514)

MEMORANDUM

TO: Board of Zoning Adjustment

FROM: Faye Ogunneye, Chief
Zoning Review Branch

SUBJECT: Proposed Alteration/Repair and Replacement to an Existing Non-Conforming Use as a "Warehouse –Waste Recycling" Structure located at premises 1315 1st Street, S.E., Lot(s) 54, in Square 703, Zoned CG/CR

Review of plans for the proposed alteration/repair and replacement to an existing non-conforming use as a "Warehouse, Waste and Recycling" structure at the above subject premises indicates that the Board of Zoning Adjustment approval is required as follows:

1. Variance pursuant to Section 2002.4 to allow proposed enlargement to an existing non-conforming use as "warehouse – waste and recycling" structure and from Section 3202.5(b) for filing this project after the Zoning Commission made a decision on the amendment of the Commercial Residential CR Zone District Classification. (Section 3103.2)

Office of Planning

DATE: May 3, 2004

SUBJECT: Eastern Trans Waste of Maryland – 1315 First Street, S.E.
Environmental Impact Screening Form BLRA No. 04-00156

Pursuant to Chapter 71, Title 20, *Environmental Policy Act Regulations*, the Office of Planning has reviewed Part 2, Item 14 *Impact on the Growth Character of the Community or Neighborhood* as outlined in the Environmental Impact Screening Form.

Conclusion: Under these regulations, the Office of Planning concludes that the reconstruction and expansion could result in **significant negative impacts on the area.**

The Office of Planning notes that the application appears to be a full reconstruction of the facility. The Zoning Commission rezoned the property to the CG/CR zone district in October 2002. The Capitol Gateway (CG) Overlay states that ***existing industrial uses with valid Certificates of Occupancy shall be deemed conforming but are not entitled to expand.*** After completion of the renovation project, approximately 10 new employees with between three to five additional vehicles will be added to the site. The proposed renovation project will substantially alter the facility.

Description of Property:
The Eastern Trans Waste facility is in the southwestern quadrant of the District, located at 1315 First Street, S.E. The 53,680 square foot site is in Square 703, and consumes all of Lot 54. N Street generally bounds the site to the north, N Place to the south, First Street to the east and Half Street is to the west. Square 703 is mostly developed with industrial uses. The property is located in the Commercial Residential (CR)) District and the Capitol Gateway (CG) Overlay. The purpose of the mixed-use district is to encourage a diversity of compatible land uses that may include a mixture of residential, office, retail, recreational, light industrial, and other miscellaneous uses.

The surrounding area is primarily developed with older light manufacturing or industrial uses. ABC Salvage Corporation, a recycling company is west of the site, there are repair shops and recycling companies north of the site and a bus garage south of the site. The Southeast Federal Center Complex is east of the facility and was zoned in 2003 for a mixture of residential, recreational and commercial uses.

Background:
Due to the age and/or damage, much of the equipment at the facility is in need of repair or replacement. The applicant is proposing to renovation the following sub portions of the facility:

- Install an additional 50' weight scale.
- Replace/repair existing structural steel.
- Replace a portion of the roof.
- Replace existing siding, including approximately 212 linear feet of brick, metal, grates, and masonry.
- Replace portions of the existing concrete floor.
- Replace existing overhead doors.
- Replace existing scale house and bathrooms.

OP concludes this to be significant the Zoning Commission may not permit reconstruction as a matter of right but subject to approval.

Comprehensive Plan
The Generalized Land Use Map generally designates the subject property and surrounding area as Mixed Use. Combinations of land use categories are depicted in areas where a variety of uses are to be encouraged. Mixed-use areas include existing commercial areas proposed for significant land use changes. The subject site and the surrounding areas have historically been used for industrial purposes. However, the entire southeast water front area was included in the recently completed Anacostia Waterfront Initiative (AWI). As a result of the AWI, the waterfront area has been rezoned by Zoning Commission Order #ZC 04-02 from M (Manufacturing) and C-M to CR (Commercial Residential). Under this rezoning a commercial or industrial use that is first permitted in the CM or M districts and that is in existence with a valid Certificate of Occupancy before the Order is published in the DC Register, shall be deemed a conforming use, but shall not be entitled to expand.

Item 14. OP analysis on whether the proposed project will disrupt or divide the physical arrangement of an existing community that might adversely impact the environment; and/or might induce significant growth or concentration of population that might adversely impact the environment:

	Will proposed project adversely impact the growth and character of the community or neighborhood?	
	Yes:	**No:**
Create a new source of significant light or shadow which would adversely impact other properties.	[ ]	[x]
Substantially degrade or obstruct any scenic view or vista now observed from public areas.	[ ]	[x]
Conflict with any applicable land use plan, (CG/CR zone district and AWI) policy or regulation of an agency with jurisdiction over the project (including but not limited to the Comprehensive Plan), which was adopted for the purpose of avoiding or mitigating environmental effect.	[x]	] }

Induce significant growth or concentration of a population that might adversely impact the environment.	[ ]	[x]
Create a demand for additional community services (schools, police. fire. recreational facilities, etc.)	[ ]	[x]

Overall Finding: In review of cumulative adverse impacts of Item 14, the Office of Planning concludes that the proposed project is not zoned CM industrial but is within the CR Mixed use zone and the Capitol Gateway Overlay (CG/CR), and could result in significant negative impacts on the area.
