2005 MAY 10 PM 3:53

Dear Mr. Griffis,

I am writing this letter as a concerned citizen who resides in the Deanwood community. It has come to my attention that our neighborhood is being targeted as a proposed site for an office building for CSOSA. I just recently learned about this project from one of my neighbor's the week of April 25, 2005. I was never informed of any meetings to discuss this issue from your office. How can you possibly implement something of this magnitude and not notify the residents who will be greatly affected by this project? I personally have to call the Mayor's Command Center once or twice a week, because people park on our street from other jurisdictions. Not to mention the trash and the loitering on our streets. These are just some of the issues that we are faced with, and we know that these issues will drastically increase if this CSOSA project comes to fruition. My question to you is, would you build this type of office building on Capitol Hill, I don't think so! In speaking for the residents in this community, we will do everything that we possibly can to curtail this project. This type of service center needs to be built downtown near the court building, or at another location outside of our community. It is very obvious that your office has an underlying objective, but I just want to inform you that we will not tolerate this injustice!

Sincerely,

Donna L. Wright
