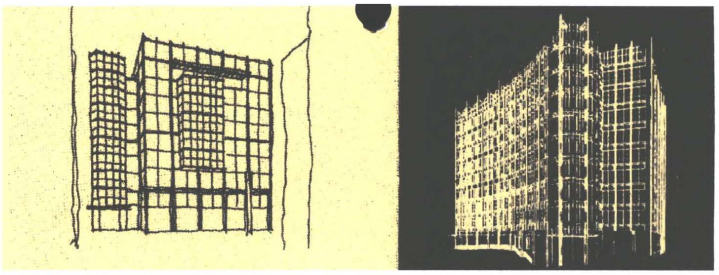
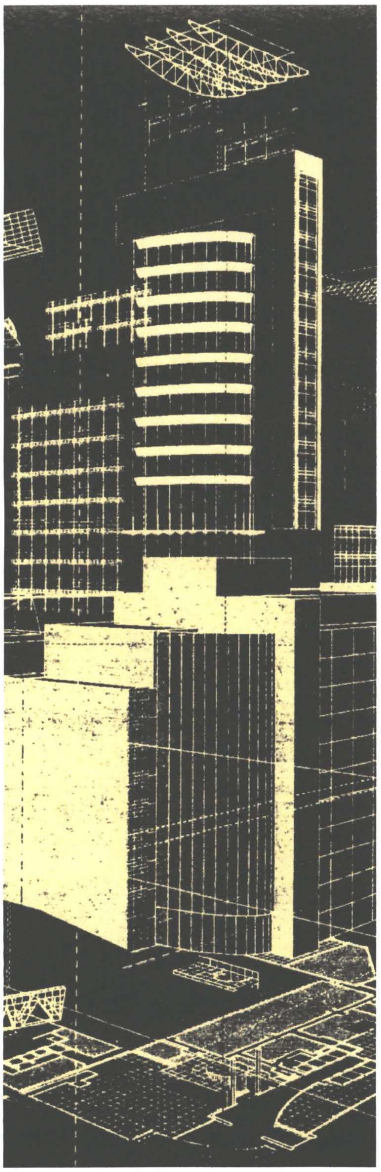
Anton Janezich, AIA





QUALIFICATIONS:

Anton Janezich has spent nearly three decades working with some of the world's leading architectural firms and architects. His depth and range of experience designing major projects in Europe, North America, Africa and Asia bring focused ability and tacit knowledge to every project he is involved. Anton's architectural vision is driven by an awareness and application for the cultural, economic, and intellectual complexities of the modern world. His experience includes Modern and historic large-scale master planning, their component buildings and infrastructure, as well as more modest-sized corporate and residential projects, and collaborations in both building and interior architecture. Prior to becoming one of the founding architects of **AJ**Architects, Anton spent 18 years with Skidmore, Owings and Merrill and was an Associate Partner at their London office. He was mentored by associates of Mies van der Rohe's office, where he learned the design of exterior curtain walls from the experts who trail blazed this art form in the mid-20th century.
