Subject: Case Number 17342

Dear Members of the Board of Zoning Adjustment,

I am writing this letter to appeal to you to confirm a limit of 180 students at the Aidan Montesorri school on 27th Street NW, where I have been living since 1985, three row houses up the street from the school.

The enrollment of 199 students during the spring of this year is almost a doubling of the number of students during the first few years when the Aidan school came to our residential neighborhood less than 10 years ago. This dramatic increase has created not only bad traffic congestion but also hazardous traffic conditions several times a day for motorists and pedestrians on 27th street as well in the alleys immediately surrounding the school. This increase in students has also added to an already strained parking situation for those residents need street parking.

The school has attempted to alleviate the situation with a number of measures. There is no noticeable improvement, however. Already, an enrollment of 180 students was pushing the limit for the narrow residential 27th Street. An increase beyond 180 students is really more than our neighborhood could bear.

Respectfully Yours,

Hans G. Israelsson
