Re: St. Patrick's Episcopal Day School – BZA Application No. 17429B

Dear Chair Horn and Members of ANC 3D, and Members of the DC Board of Zoning Adjustment:

On behalf of The George Washington University, I am pleased to express our support for St. Patrick's Episcopal Day School's Campus Unification Project and BZA Application No. 17429B.

The George Washington University and St. Patrick's have enjoyed a longstanding relationship as neighboring institutions. Over the years, our organizations have worked collaboratively to coordinate operations, communicate proactively, and address matters of shared interest in ways that benefit our respective communities and the surrounding neighborhood.

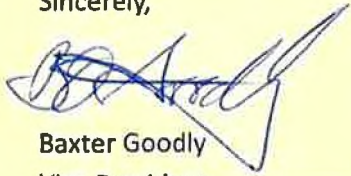

As St. Patrick's prepares for the construction of its permanent middle school, we have worked closely with members of their team and have agreed to permit construction access through our Whitehaven Parkway entrance, which we understand will significantly reduce construction-related impacts on nearby residential streets.

In addition, our institutions continue to engage in discussions regarding opportunities for St. Patrick's to use the VEX shuttle system and to continue utilizing university parking resources in support of St. Patrick's broader transportation management strategies. We appreciate the collaborative approach St. Patrick's has taken throughout this planning process and remain committed to continuing these conversations as the project moves forward.

We are confident that St. Patrick's will continue to be a collaborative and responsible institutional neighbor during construction and after the completion of its new middle school. We look forward to maintaining our longstanding partnership and continuing to work together to support the surrounding community.

For these reasons, The George Washington University supports St. Patrick's Episcopal Day School's BZA Application No. 17429B.

Sincerely,

Baxter Goodly
Vice President
Division of Safety and Operations
The George Washington University
