

Good day, It is with regret that I oppose BZA Case No. 19185. I hope that we will be able to address my concerns regarding this application. 1. We would like for DDOT to provide turnaround space for emergency vehicles. 2. The issue of attaining an apartment within a residential block. As you know when the financial responsible owner is not involved with the upkeep of the neighborhood this can cause a problem with the value and peacefulness of my home. 3. Also I have noticed that none of the paperwork submitted refers to a water connection, and I am concerned that your property is connected to the water supply on my property. Again I look forward to a conference to discuss my issues and perhaps a resolution.
