

Jami L. Milanovich, P.E.

PRINCIPAL ASSOCIATE

Ms. Milanovich is a registered professional engineer with 20 years of experience in a wide range of traffic and transportation projects including: traffic impact studies, corridor studies, parking analyses, traffic signal design, intersection improvement design, and signing and pavement marking design. Over the past decade, Ms. Milanovich has worked primarily in the District of Columbia on a multitude of mixed-use, residential, institutional, and office projects throughout the City. A sampling of her projects is included below.

MIXED-USE DEVELOPMENTS

CAPITOL CROSSING, WASHINGTON, D.C.: Located in the heart of DC in the Judiciary Square neighborhood, Capitol Crossing is a mixed-use project including 2.2 million square feet of office, residential, and retail development. The three-block site of the proposed Planned Unit Development (PUD) is bordered by E Street on the south, Massachusetts Avenue on the north, 3rd Street on the west, and 2nd Street on the east. The project will span I-395. Since the traffic impact study was completed in conjunction with the original PUD, Ms. Milanovich has been responsible for the following:

- Updated traffic impact studies evaluating proposed changes to the plan;
- Evaluation of modified access for the project;
- Review of the proposed below-grade loading facilities to ensure accessibility and maneuverability; and
- Testimony before the District of Columbia Zoning Commission for 2nd Stage PUD applications and PUD Modifications.

Recent approvals by the Zoning Commission include approval of the Second-Stage PUD application for the Center Block on January 27, 2014.

CONGRESS HEIGHTS, WASHINGTON, D.C.: Located at the Congress Heights Metro Station, the proposed PUD includes a mixed-use development with approximately 216 residential units, 240,000 SF of office space, and 15,000 SF of retail space. In conjunction with the PUD, Ms. Milanovich was responsible for the following:

- Oversight of the traffic impact study conducted in conjunction with the PUD application and
- Testimony before the District of Columbia Zoning Commission.

The Zoning Commission approved the project in February 2015.

CASE NO.19267

EXHIBIT NO.3713

GATEWAY MARKET, WASHINGTON, D.C.: Gateway Market is a proposed mixed-use development located at the intersection of Florida Avenue and 4th Street NE, on the fringe of NoMA. The proposed PUD will include a 155,200 SF residential component and a 27,500 SF retail component, including a potential grocer. In conjunction with the PUD, Ms. Milanovich was responsible for the following:

- Extensive safety analysis of the proposed access on Florida ;
- Coordination with the District Department of Transportation (DDOT) regarding the proposed site access;
- Oversight of the traffic impact study conducted in conjunction with the PUD application; and
- Testimony before the District of Columbia Zoning Commission.

The Zoning Commission approved the PUD application on January 27, 2014.

CAPITOL PLACE, WASHINGTON, D.C.: Located just blocks from Union Station, Capitol Place will replace an existing surface parking lot with a mixed-use development including 375 residential units and 20,000 SF of retail space. The proposed development will be located along 2nd Street NE between G and H Streets NE. Due to changing market conditions, the originally approved development was modified to provide more but smaller residential units and fewer parking spaces. Ms. Milanovich conducted a traffic study to evaluate the impact of the proposed changes, including an evaluation of the appropriateness of the reduced parking ratio. Ms. Milanovich also worked with the developer and DDOT to modify the proposed loading facilities to eliminate the need for 55-foot trucks. The modified plan was approved by the Zoning Commission on April 12, 2012.

360 H^o, WASHINGTON, D.C.: Located just two blocks from Union Station in the Near Northeast neighborhood of the District, the mixed-use project, which was completed in 2013, includes 215 apartments, a 42,000 SF Giant supermarket, and 1,500 SF of additional retail space. Ms. Milanovich was responsible for preparing a traffic evaluation submitted in support of a PUD Modification. The traffic evaluation included an evaluation of bicycle, pedestrian, and non-auto transportation facilities, and Transportation Demand Management and Loading Management plans for the project.

Ms. Milanovich provided expert testimony before the District of Columbia Zoning Commission, which approved the project on January 11, 2010.

CATHOLIC UNIVERSITY OF AMERICA (CUA) SOUTH CAMPUS REDEVELOPMENT, WASHINGTON, D.C.: The five blocks that comprise CUA's South Campus encompass 8.9 acres of land generally bounded by

Michigan Avenue on the north, Kearney Street on the south, the WMATA/CSX tracks on the east, and the Dominican House of Studies and Theological College on the west. The nearly one million square foot redevelopment, which currently is under construction, will create a mixed-use development consisting of residential, retail, and arts components interwoven into the existing Brookland Community. As proposed, the development will consist of 761 residential units, 83,000 SF of retail space; and 18,000 SF of arts space. In conjunction with the project Ms. Milanovich was responsible for the following:

- Oversight of the traffic impact study conducted in conjunction with the PUD application;
- Review and evaluation of the proposed realignment of the Michigan Avenue/Monroe Street intersection;
- Evaluation of the proposed loading facilities associated with the project;
- Preparation of a Transportation Demand Management Plan for the project; and
- Testimony before the District of Columbia Zoning Commission.

SQUARE 54 REDEVELOPMENT, WASHINGTON, D.C.: Square 54, which is located adjacent to Washington Circle on the George Washington University's Foggy Bottom Campus, is the site of the former GW Hospital. In 2006, GW, Boston Properties, and KSI submitted a PUD application to develop the then vacant site with a 881,000 SF mixed-use project including a 497,000 SF residential component, a 329,000 SF office component, and a 55,000 SF retail component, including a grocery store. In conjunction with the proposed PUD application, Ms. Milanovich conducted a multi-modal transportation impact study, which evaluated: off-site automobile, pedestrian, and bicycle impacts; adequacy of the proposed number of parking spaces; and adequacy of the proposed number and location of loading berths. A Transportation Demand Management Plan also was provided as part of the traffic study. Ms. Milanovich provided expert witness testimony before the Zoning Commission, which approved the project in March 2007. Since the project opened in 2011, Ms. Milanovich has been responsible for conducting the annual transportation performance monitoring for the project, which is required as a condition of approval.

1400 14TH STREET, WASHINGTON, D.C.: Located in the Logan Circle neighborhood, the proposed project would include the redevelopment of three buildings located on the northwest corner of the Rhode Island Avenue/14th Street NW intersection. The proposed plans call for the renovation and incorporation of one of the three buildings which has been designated as contributing to the Greater 14th Street Historic District. The other two buildings will be razed. The proposed mixed-use redevelopment will include 12,841 SF of retail space, 4,578 SF of office space, approximately 30 dwelling units, and just three on-site parking spaces. Ms. Milanovich was responsible for the completion of a parking study in support of a Board of Zoning Adjustment (BZA) application for parking relief from the zoning requirements. As part of the parking study, inventory of transportation options available in proximity of the site, including an inventory of public transportation, car-sharing vehicles, pedestrian facilities, and bicycle facilities was conducted. On-street and off-street parking inventories in the surrounding area also were conducted to determine the availability of off-site parking near the site. Ms. Milanovich also prepared a Transportation Demand Management plan to reduce the number of vehicles on-site. Ms. The requested parking relief was approved by the BZA in January 2013.

1728 14TH STREET; WASHINGTON, D.C.: Located in the Logan Circle neighborhood, this proposed redevelopment included redevelopment of a warehouse to a mixed-use development. Three redevelopment scenarios were contemplated, each of which included both office and retail developments. In conjunction with the proposed redevelopment, Ms. Milanovich was responsible for the preparation of a traffic evaluation to support the requested parking and loading variances. As part of the traffic study, transportation options proximate to the site were inventoried. On-street and off-street parking inventories of the surrounding area were conducted to determine the availability of off-site parking near the site. A Transportation Demand Management Plan was prepared to reduce the number of vehicles on-site. A loading evaluation also was conducted to ensure that the proposed loading facilities could accommodate the anticipated deliveries. A Loading Management Plan was developed to support the requested loading relief. The requested parking and loading relief was approved by the BZA in December 2012.

ART PLACE AT FORT TOTTEN, WASHINGTON, D.C.: Art Place at Fort Totten is a proposed 1.9 million square foot mixed-use development that will transform an obsolete garden apartment complex into a mixed-use, pedestrian- and transit-oriented town center with an emphasis on the arts. The proposed redevelopment will include 929 residential dwelling units (including 98 units designated for senior housing), retail shops, daycare center, senior center, community center, children's museum, public library, and space for the

Washington Opera Company and Shakespeare Theater. Ms. Milanovich prepared a comprehensive transportation impact study in conjunction with the proposed PUD. The study evaluated the on-site street and block plan, street connections to adjacent land parcels, street and driveway connections to South Dakota Avenue and Galloway Street, and site traffic impacts on the South Dakota Avenue/Riggs Road and other off-site intersections. The Zoning Commission approved the PUD on December 14, 2009. Ms. Milanovich continues to provide on-going support and evaluation related to modifications to the original PUD.

OFFICE

2100 PENNSYLVANIA AVENUE, NW, WASHINGTON, D.C.: The proposed redevelopment in the Foggy Bottom neighborhood of the District includes construction of a new 250,000 SF office building (with up to 22,428 SF of ground floor retail space) in place of an existing 87,554 SF office building. Ms. Milanovich was responsible for the preparation of a comprehensive transportation study in support of the proposed redevelopment. Specific project challenges included development of a loading management plan sensitive to the adjacent residential building and development of a transportation monitoring program to mitigate the impact of the proposed redevelopment. The project was approved by the District of Columbia Zoning Commission in January 2013.

LABORERS' INTERNATIONAL UNION OF NORTH AMERICA (LIUNA), WASHINGTON, D.C.: LiUNA proposes to expand its existing headquarters, located at the corner of 16th Street and I Street NW, just two blocks from the White House. The proposed 53,315 SF expansion would take the place of an existing surface parking lot adjacent to the headquarters. Ms. Milanovich was responsible for the preparation of a traffic assessment for the proposed expansion. Prior to starting the transportation assessment, an access plan was developed in consultation with the project team and the DDOT that was acceptable to all parties. The access plan successfully demonstrated that, in this case, providing access from the alley was not feasible due to the constrained alley conditions. Ultimately, reuse of an existing curb cut on I Street was determined to be the best solution. The project was approved by the BZA in October 2013.
