

To whom it may concern.

I am writing this letter in support of the rear deck proposal by Geoff Earle and Cecil Cortes-Earle, who are my next door neighbors (BZA project number 19291). They are seeking relief from rear setback and lot coverage regulations. I have communicated with Mr. Earle about the project and his description about the plans. The deck they wish to construct

appears to fit the current atmosphere of the street. It appears to be smaller than many other rear decks on the alley behind Hobart and would not affect access to my home; it would not affect light and shade. I think, it would be an improvement over their current back yard.

Sincerely,
