**To:** Barry, Maria (ANC 4C02)

**Subject:** Support for Kingsbury school

Dear Ms Barry,

As a homeowner and resident of 4C02 for 6 years now, with no children in my house but some wonderful neighbors whose families attend LAMB, I'm writing to voice my strong **support** of moving LAMB in to the Kingsbury space. I attended the ANC meeting last month and listened to the arguments on each side but didn't get the chance to speak. I do believe that this would be a fantastic asset for the neighborhood, and I agree with the traffic impact study that suggests no to minimal impact (I even agree with them about the Gallatin stoplight that could be re-timed for better traffic flow--well spotted!) The families I know would definitely walk or bike to school, which would reduce traffic here and along their current commutes to LAMB's other campuses.

No-one needs to tell any of us that D.C. needs good schools. I say we support this school in its success--and, yes, I'm all for making sure that they minimize traffic impacts and work with West as much as possible. I would *\*love\** to see a solid charter-public partnership, and I would fully support our ANC in asking for concrete plans for that partnership to be developed.

Thanks--and good luck with this! I really appreciate the work you're doing for our community.

All the best -

Bonnie Foote
