

I was wondering what provisions Mr. Meyer and Mr. Lawrence are making for parking. Adding nine new units to a block that is already experiencing a shortage of on street parking could potentially add 9 more more cars looking for parking. Now assuming the current 1310 property had two people driving that would/could still add 7 more cars to the neighborhood mix. What are their plans????? 1320 Vermont Ave. NW was just recently redeveloped with I believe two parking spaces for 5 (or 6) units. It was previously a single town house.
