Existing and Intended Uses, Burden of Proof

**Project Address : 809 49th St NE Square:5178 Lot: 806 Zone R2
Owner: Reno 809 LLC**

Variance pursuant to Subtitle D 302.1 to subdivide existing tax lot into three (3) of separate lots, of which one proposed lot will not meet the minimum lot width or area requirements.(X, 1001.2)

The property currently has 1 single family detached home positioned in the middle of the lot. The total lot is 12,000 sq ft. We intend to build a semi- detached home on the lot which is non- conforming. R2 zoning requires a 30ft lot width and the width is 28.1, a deviation of 1.9. The square footage required is 3000sq ft and it is currently 2810, a deviation of 1.6%. This is a very small deviation from the set requirements. The project that we are proposing will not be inconsistent with the general intent of the zoning regulations and map. It is also consistent with neighboring properties.

Zoning Height Limit 40 ft Proposed Project 25.9 ft

Zoning Max Stories 3 Proposed Project 2 Stories

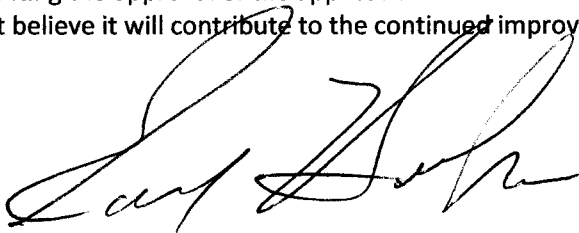

Zoning Front Setback- No lesser or greater than existing. Proposed Project No lesser or greater than existing.

Zoning Rear Yard Setback 20 ft Proposed Project 20ft or greater.

Zoning Side Set Back 8ft, Proposed Project 8ft set back

The proposed project will have off street parking.

Granting the approval of the application will not be of substantial detriment to the public good. We in fact believe it will contribute to the continued improvement of the Deanwood neighborhood.
