**Washington Nationals Youth Baseball Academy
T-Mobile Light Standard Replacement**

Overview: The T-Mobile antenna installation on the Washington National Youth Baseball Academy is designed to require nominal maintenance and service. The facility will be unmanned and hard wired directly to municipal electric and telephone service. The installation will be remotely monitored and will be visited by authorized personal one a month for general maintenance and condition evaluations.

1. T-Mobile will post an appropriate notice on the exterior of the site with identification information and contact information for the public to report any issues or concerns regarding the site.
2. Service and maintenance inside the equipment compound will be performed on an “as-needed” basis and will not affect to overall visual attributes of the installation. The compound fence will be board on board in order to reduce the visual effect of the site.
3. Post construction, depending on the underlying conditions, areas affected by construction would be graded, seeded and/or sodded to reclaim the area to its original condition as reasonably possible.
