Community Engagement

The Hearst Park and Pool project has been in conversation and progress with the community since 2015. DGS alongside DPR has had more than two dozen meetings regarding the Hearst Park and Pool project to update the ANC and encourage community engagement throughout the design phases through a wide variety of meetings. This project has also received support and gone through a number of approval processes as identified on the following slide. Below are a few notes highlighting key items related to the cycle of the project thus far.

- In November of 2016 DGS & DPR hosted a public survey. 1100 people responded to a question asking if they were in favor of a pool and of these over 72% were in favor.
- As previously noted, DPR & DGS have hosted over a dozen community meetings since the initial survey and have attended over a dozen ANC meetings ensuring that the community was kept apprised of the progress.

2016

- Intro Presentation May 2016
- Project Q&A June 2016
