Kristi and Charles:

Just received your note about your planning for a garage. We do not oppose the construction. Would like to make sure that during the construction the alley is not blocked (we are almost right behind you and some days do go in and out frequently). If it is necessary to have vehicles in the alley, please make sure that someone is always available to move them out of the way if necessary. Also, since every time there is construction in the alley, we seem to get a flat tire, it is mandatory that every, every day, there is total clean up of the alley to prevent more flat tires.

Good luck with your project

Mary and Jim  
222 9th Street
