

My name is David DiGiovanna. I live at 643 D Street SE, Washington DC. I am writing to ask the Board to APPROVE application no. 20608 for Special Exception relief to construct a rear and below grade addition to the existing detached public library in the RF-1 Zone. The proposal to rebuild and modernize the existing Southeast library has been subject to extensive public consultations over the past 3-4 years. The DC Library and the architects have taken almost all of the public comment into account in the draft architectural plan. A refurbished and expanded library is greatly needed by the community. I hope that the Board will promptly approve the application so work on the new library can begin as scheduled later this year. Thank you.
