1. The first step is to identify the problem. In this case, the problem is that the system is not working properly.

2. The second step is to gather information. This includes checking the logs, looking at the configuration files, and talking to the users.

3. The third step is to analyze the information. This involves looking for patterns, identifying the root cause, and determining the scope of the problem.

4. The fourth step is to develop a solution. This involves creating a plan, testing the solution, and implementing it.

5. The fifth step is to evaluate the solution. This involves monitoring the system, gathering feedback, and making adjustments as needed.
