

# PROGRAM STRATEGY

**01**

**SIX RESIDENCES**

- Six 2BR/2BA residences — two per floor on floors 2, 3 & 4
- ~1,063–1,160 SF per unit | elevator + historic stair core
- Restored 1906 Totten envelope; 5 secured parking spaces

**02**

**BUILDING AMENITY**

- Ground-floor entry, parlor & gathering space + fitness
- Landscaped garden, pool & secured parking court
- New elevator serving all residential floors

**03**

**IN-RESIDENCE AMENITIES**

- Wellness / longevity suite — sauna, steam, cold plunge
- In-residence fitness; wine storage and bar integration
- Entertaining-focused layouts

**04**

**SECURITY, PRIVACY & TECHNOLOGY**

- Advanced access control; discreet, controlled circulation
- Remote entry for owners, guests, staff, and deliveries
- Integrated package management

**BOTTOM LINE**

The as-filed 6-unit multifamily program is the economically feasible use — it supports both a for-sale condo conversion AND a rental hold. The by-right single-family home supports neither viably (see Single-Family Analysis).

## THE PROGRAM

- Six 2BR/2BA residences — two per floor on floors 2, 3 & 4
- Northeast + South residence on each residential floor
- ~1,063–1,160 SF per unit | 16,188 SF GFA
- New elevator + historic stair core; 5 secured parking
- Ground-floor entry, parlor, fitness, garden & pool

## UNIT MIX BY FLOOR

|                        |                 |                      |
|------------------------|-----------------|----------------------|
| <b>Floor 2</b>         | 2 × 2BR/2BA     | <b>~2,185 SF</b>     |
| <b>Floor 3</b>         | 2 × 2BR/2BA     | <b>~2,230 SF</b>     |
| <b>Floor 4</b>         | 2 × 2BR/2BA     | <b>~2,295 SF</b>     |

#### WHY STRETCH COMPS ARE NOT DIRECT MATCHES

Stretch comps are full-service or new-construction buildings (PH units, Georgetown / Penn Quarter / West End / Shaw) — different value drivers than a 6-unit Kalorama walk-up. They show what \$1,300–\$1,556/SF requires (concierge, amenitized building, new construction, or PH product), but are not directly comparable to our boutique program.

Source: Kimberly Casey Team | McWilliams|Ballard Pricing Analysis (4/30/2026). Direct = 2,000+ SF 3BR/2.5–3.5BA in Kalorama / Dupont. Stretch = top 5 of Bright MLS DC ultra-luxury set (excl. waterfront).

**RESIDUAL LAND VALUE****\$6,179,804**

## WHAT THE \$2,500/SF CASE ASSUMES

- High-quality finishes appropriate to the Kalorama boutique-condo tier
- Six 2BR/2BA residences with elevator access and 5 secured parking spaces
- Priced on real unit area (~6,604 SF) — buyers pay a premium for the building's shared amenity, not just interior SF
- Top-floor and parking premiums realized
- A one-off product — pool, fitness, parlor, elevator, restored mansion — with no direct condo comp at this scale

## KEY SENSITIVITIES

Each +\$100/SF in outsale lifts land value ~\$0.5M | Each +\$100/SF in hard cost reduces land value ~\$1.6M.

## A PREMIUM, ONE-OF-ONE PRODUCT

Priced on the real ~6,604 SF of unit area at a premium \$2,500/SF. Residual land value is ~\$6.2M — within reach of the \$7.4M basis; the completed sellout (~\$16.5M) and the rental hold (next section) capture the building's full value.

Soft \$25/SF GFA; contingency 5% + developer fee 3% of hard+soft; cost of sales 7.9%; 20% profit on total cost; 12-month construction carry; hard cost \$300/SF GFA. ~6,604 SF of unit area per the BZA plans across six residences; 16,188 GFA.

**PREMIUM CASE — \$2,500 / SF**

**RESIDUAL LAND VALUE**

**\$6.18M**

**GAP vs. OWNER'S BASIS**

**-\$1.22M | -16%**

*On the real ~6,604 SF at a premium \$2,500/SF. Residual land value is ~\$6.2M — approaching the \$7.4M basis; the completed sellout is ~\$16.5M.*

**OBSERVATIONS**

- On the real ~6,604 SF of unit area at a premium \$2,500/SF, the for-sale condo path supports ~\$6.2M of residual land value — far above the single-family alternative.
- Residual land sits just below the \$7.4M basis; the completed sellout (~\$16.5M) clears it — the owner captures value by building.
- Six 2BR/2BA residences sell into a deep boutique-condo buyer market; the program can also be held and rented.
- Execution flexibility — for-sale OR rental — is the decisive advantage over a single-family home.

**KEY SENSITIVITIES**

Each +\$100/SF in hard cost reduces land value ~\$1.6M | Each +\$100/SF in outsale lifts land value ~\$0.5M.

**CONDO LAND VALUE**

**\$6.18M**

A premium, one-of-one product. Compare to the rental hold (next section, ~\$18.2M stabilized) and the single-family alternative, which loses money at basis.

## STABILIZED NOI BUILD

|                                          |                    |
|------------------------------------------|--------------------|
| Gross potential rent (6 × 12 × \$15,000) | <b>\$1,080,000</b> |
| (+) Parking (5 spaces × \$200/mo)        | <b>\$12,000</b>    |
| Annual gross income                      | <b>\$1,092,000</b> |
| (-) Vacancy & collection (5%)            | <b>(\$54,600)</b>  |
| Effective gross income                   | <b>\$1,037,400</b> |
| (-) Operating expenses (30% of EGI)      | <b>(\$311,220)</b> |

## STABILIZED NOI

**\$726,180**

NOI = \$726,180 → capitalized on the next page

## PREMIUM RENTAL — \$15,000/MO

- \$13.64/SF/mo on ~1,100 SF 2BR/2BA residences — a steep premium above the comp set
- Supported by premium rents of ~\$13,000–\$16,000/mo in Dupont / Kalorama
- Provides a financeable income stream and a fallback if the for-sale market softens
- No single-family equivalent — luxury home rentals thin out well below 16,000 SF, and the rent wouldn't support the value.

## THE VERSATILITY ARGUMENT

The multifamily program can sell OR rent. That optionality is what the by-right single-family home lacks.

## INCOME FALLBACK

Held and rented, the 6-unit program produces ~\$726K of stabilized NOI — a financeable income stream. A 16,000 SF single-family home has scarce rental demand and no comparable income stream.

$$\text{STABILIZED VALUE} = \text{NOI} \div \text{CAP RATE}$$

**4.0% CAP**

**\$18.15M**

*Aggressive*

**4.5% CAP**

**\$16.14M**

*Mid*

**5.0% CAP**

**\$14.52M**

*Conservative*

**KEY OBSERVATION**

At the premium \$15,000/mo rent and a 4.0–5.0% cap, the stabilized income stream is worth \$14.5M–\$18.2M before construction. Net of construction and a 20% developer return, the rental residual land value is ~\$8.7M (see Apples-to-Apples) — above the \$7.4M basis, the strongest of any path.

**ASSUMPTIONS**

- Program: as-filed 6-unit apartment house (six ~1,100 SF 2BR/2BA residences)
- Premium rent \$15,000/mo per residence (\$13.64/SF/mo); vacancy 5%; operating expenses 30% of EGI
- Cap range 4.0–5.0% reflects a boutique 6-unit luxury rental in Kalorama Heights (4.0% aggressive / 5.0% conservative)
- Stabilized NOI basis; lease-up and construction carry captured in the Apples-to-Apples residual land value

#### IMPLICATION FOR THE SINGLE-FAMILY PATH

At 16,188 SF the subject would be larger than every comp — and \$/SF falls as homes get larger. The realistic luxury single-family market clears at \$762-\$970/SF (median \$888); only billionaire-tier buyers absorbed 16k SF product. Just five in-band homes sold across luxury DC in two years, with 14-month to 5-year marketing periods. Underwriting the subject conservatively at \$750/SF reflects its super-size, a near-empty buyer pool, and lack of rental fallback.

**RESIDUAL LAND VALUE \$941,941**

## WHY THE SINGLE-FAMILY PATH FAILS

- At the owner's \$7.4M basis, the single-family build returns ~-\$4.4M (-27% on cost) — it does not pencil.
- Supports only ~\$0.9M of land value vs. condo \$6.18M and rental \$8.74M — the lowest of every path.
- Buyer pool is near-empty: only five DC homes of this size sold in two years; 14-month to 5-year marketing.
- Lack of rental fallback — very limited rental market at a 16,000 SF mansion, so a single illiquid sale is the only exit.
- Historic 1906 Totten mansion — the exterior must be preserved (no demolition; HPRB review for changes), and at 16,188 SF it's far larger than one household needs.

## SENSITIVITY

Each +\$100/SF in outsale lifts RLV ~\$1.1M (to ~\$2.1M at \$850/SF — still far below condo/rental). At \$400/SF construction for a bespoke mansion, RLV is ~\$0.94M.

## NOT FINANCIALLY FEASIBLE

The by-right single-family use cannot support the property's basis or a financeable return. Only the multifamily program produces a reasonable, financeable outcome with execution flexibility.

*Methodology identical to the condo/rental underwriting (soft \$25/SF GFA, contingency 5% + developer fee 3% of hard+soft, cost of sales 7.9%, 20% profit on total cost). Carry extended to a 30-month restoration + marketing exposure to reflect the comp sale periods. Hard cost \$400/SF GFA reflects bespoke single-family construction vs. \$300/SF for the repeatable multifamily units.*

## RESIDUAL LAND VALUE

**\$6,179,804**

## RESIDUAL LAND VALUE

**\$8,739,179**

## RESIDUAL LAND VALUE

**\$941,941**

## BOV ANCHOR

**Multifamily land: \$6.2M – \$8.7M****Single-family: ~\$0.9M**

## READ-THROUGH

Multifamily supports \$6.2M (condo) to \$8.7M (rental) of residual land value — rental clears the \$7.4M basis (+18%), vs. just \$0.9M for single-family (-87%). Lower build cost (\$300 vs \$400/SF) widens the gap.

## FOR-SALE CONDO

## RESIDUAL LAND VALUE

**\$6.18M***Premium \$2,500/SF | gap ~\$1.22M (~16%)*

- ~6,604 SF unit area (per plans) across 6 residences
- Deep, liquid Kalorama boutique-condo buyer market
- Can pivot to rental — built-in execution flexibility

## HOLD-AND-RENT

## RESIDUAL LAND VALUE

**\$8.74M***Premium \$15,000/mo @ 4.0% cap*

- Stabilized value ~\$18.2M (NOI \$726K @ 4.0% cap)
- Financeable income stream; premium leases
- Fallback if for-sale softens — the multifamily optionality

## SINGLE-FAMILY (BY-RIGHT)

## RESIDUAL LAND VALUE

**\$0.94M***~27% return at basis — NOT FEASIBLE*

- One ~16,188 SF restored mansion at \$750/SF ≈ \$12.1M
- Near-empty buyer pool; 14-mo to 5-yr marketing; no rental fallback
- Loses ~\$4.4M at the \$7.4M basis — cannot be financed

## BOV ANCHOR

**\$6.2M – \$8.7M**

Multifamily residual land value (condo \$6.2M / rental \$8.7M); completed value ~\$16–18M. Single-family supports only ~\$0.9M.

## POSITIONING

The by-right single-family use is not financially feasible — it loses ~\$4.4M at basis with no buyer pool and no rental fallback. The multifamily program is the only use that produces a reasonable, financeable return; the rental path clears the owner's basis and the condo approaches it.

*Preliminary high-level analysis. Subject to architectural refinement, detailed feasibility study, entitlement outcome, and updated market conditions. The single-family scenario assumes restoring the existing historic building (exterior preserved) rather than demolition and rebuild, consistent with the by-right R-3 use.*
