PROJECT DESCRIPTION:

The project includes the construction of a single building containing two dwelling units. The building is limited to three stories and 35' in height and will have a partially buried cellar; first floor, second floor, and third floor. The cellar will be constructed of CMU, the remaining framing, flooring, and roof will be constructed of wood, type V construction.

The floors will be roughly 966 sf each for a total building area of 3,986 sf. The dwelling units will contain a kitchen, living/dining area, laundry, three sleeping rooms, and bathrooms.

The lower unit will have a rear patio at grade. The upper unit, occupying the second and third floor will have a rear balcony on the third floor.

The dwelling units will be heated and cooled by a gas fueled HVAC ducted system. Each unit will also contain a gas fueled hot water heater. The building will be sprinklered.

A building permit, B1811092, was issued for the work above in early January 2019.

We are seeking BZA approval for a special exception per section C-1500 Penthouse. The roof is proposed to contain a 156 sf roof deck and an 82 sf stair penthouse. The roof deck is accessed from the 3rd floor via an internal stair.
