Re: Case No. 02-19 Forest Hills Tree & Slope Overlay Proposal.

To Whom It May Concern:

Laws are needed in a civilized society to maintain good order and fairness, as long as they emanate from the people, for the people, and are approved by the people. Zoning laws clearly fall into the same mix. Zoning is essential for good land planing and its use in our city, provided it is fair and universally applied.

What we have here is anything but that. The people that presented this agenda denied others membership that might oppose such new laws and ANC members deceived others by eliminating their district from the new proposals.

It is difficult for me to swallow the denial of not only my property rights but my voting rights as well, by people in a position to do so. This whole agenda has been not only falsely presented but pretentiously accepted by the Zoning Commission.

I am sure that any charges against my neighbors will be thrown out in a court of law because of its very foundations and infringements on our property rights.
