

DC Zoning Commission Case # 02-26 A
GW Health and Wellness Center
Hearing: November 15, 6:30 PM

Impact Statement
St. Mary's Episcopal Church

- Passage of Zoning Commission Case #02-26 A, would allow St. Mary's Episcopal Church and George Washington University (GW) to foster a renewal of community spirit. As GW embarks on its community outreach, honoring past commitments of offering St. Mary's and the adjacent neighbors usage of the Health and Wellness Center, brings a new found awareness that all can exist in our beloved Foggy bottom / West End neighborhood.
- The impact the Health and Wellness Center will have on St. Mary's aging congregation of senior, young families, and professionals, will be significant. A major component in the St. Mary's community is spirituality, which embarks on the **mind, body, and soul**. Exercise, usages of the pool, indoor track, group walks, and classes in dancing, nutrition, health topics, play a significant roll in achieving wellness, which is essential to sustaining life.

Respectfully
Lionel A. Gloster
St Mary's Episcopal Church
