Subject: Case #02-30

Dear Sir/Madam:

I would like to express my displeasure at Georgetown University's plans to construct a large boathouse between the C&O Towpath and the Potomac River near Key Bridge.

The size of this proposed facility seems to be excessive and should be scaled back to a more reasonable proportion and not used to clutter up such a natural setting.

They can certainly build a more reasonably sized boathouse without turning the project into a convention center and elaborate meeting facility at the same time.

I hope that your review of this project allows you to come to the same conclusion, i.e., the size and scope of the proposed facility should be in line with the location and that such a tall boathouse should not be allowed at this site.

Thank you for your time and attention.

Sincerely,

Joseph M. D'Amico
