Washington, D. C. 20001

Dear Chair Mitten:

Re: Georgetown University Boathouse

I am submitting this second comment in support of the above boathouse, but focusing on the issue of parking.

In the latest plan for the park, 41 on-street parking spaces are provided on K Street just east of Key Bridge. A full copy of this plan by Wallace, Roberts & Todd, Preferred Schematic Site Plan, dated March 27, 2003, should be available from the National Park Service.

I am enclosing however a partial copy of the western end of this plan showing where the on-street parking spaces are to be located on K street. The circles to the west of K Street represent a turn-around/dead-end of the public street. (The plan is to close K Street to thru traffic after Key Bridge and after the NPS acquires the 3 town houses just to the west of the Bridge, represented by the broken lines on this partial copy of the plan).

These 41 parking spaces would be available to the public and for the use of boathouse patrons, if necessary.

Sincerely,

Austin Graff
