02-3

Dear Ms. Witten,

We oppose the loss of parkland to the GU. boat facility. We bike, walk and canoe and this facility would impinge on all our outdoor activities.

Because we are not geologists, we can not say for sure what the effects on the river and its banks would be, but we believe they would be substantial. This should be determined by a geologist.

There are many places on the Potomac and Anacostia Rivers that would welcome the development GU proposes. The
