Subject: SW DC

Please do a safety study on 4th and M Streets, SW before any further building is permitted or allowed. Crossing 4th and M Streets, SW is dangerous to neighborhood pedestrians and stadium visitors. Few drivers obey the no left turn signs, and there is no enforcement. There are also children crossing those streets after school, which is a disaster waiting to happen. The sad story of the EMS truck stalled on 4th Street today because traffic laws are not enforced there either, is the talk of the neighborhood. A safety study is crucial before anything else can be added to the Waterfront neighborhood.
