**Subject:** 02-381 Zoning Case Matter

My wife and I have lived in SW DC for six years. Each year has brought more traffic, more congestion and has heightened our awareness to be especially vigilant around the area of 4th Street and M street SW.

That intersection has killed at least one person from cars going south routinely making an illegal left turn onto M street.

The crosswalks on 4th Street around Safeway are unsafe from the congested created by multiple factors that need addressing before the vacant lots are build out creating even more traffic.

We understand that the subject zoning when finally approved as proposed will only exacerbate the current unsafe situation.

We urge that a comprehensive safety study be initiated immediately with citizen input that hopefully will recommend and implement safety focused measures.

Sincerely

Robert Richardson  
Audrey Hinton  
550 N Street SW S602
