**Subject:** RE: 1000 4th Street - CaBi Station

See below- we looked back to December 2017. During that time the station generated over 25,000 trips, which is very high- close to twice the ridership of the average station. Below there is a graph of the average number of bikes and docks available on a given weekday. You can see that the station empties out very quickly during the AM rush and stays mostly empty all day.

Overall this is a very high performing station. Stations with this level of activity generally indicate that there is more demand than supply for Bikeshare in the area.
