Experience

Mr. Shaw has extensive experience as a project manager and programmer for campus based mental health facilities. In addition his responsibilities have included master planning, schematic design, design development, production and supervision of construction documentation, and construction administration. A representative list of his relevant project experience follows.

Saint Elizabeths Hospital, District of Columbia Department of Mental Health, *Washington, DC*
Project Manager/Programmer for the Concept Study including preliminary programming, site planning and costing for a multi-building replacement facility to include a 225-bed forensic unit, a 75-bed acute care psychiatric facility, and a 20-bed child and adolescent residential care facility on the existing campus.

Mental Health Facilities Design Services, District of Columbia Commission on Mental Health Services, *Washington, DC*
Project Manager/Programmer for the programming, building evaluation, and design review for various programs for the District of Columbia Commission on Mental Health Services

Building 25, DC General Hospital, District of Columbia Commission on Mental Health Services, *Washington, DC*
Project Manager/Programmer for the feasibility study for renovation of the existing building to accommodate the Region III Community Mental Health Center (CMHC) for the including phasing and cost analyses.

The Jefferson School (Phases I &II), Sheppard Pratt Health System, *Jefferson MD*
Project Manager/Programmer for the master planning, programming, design and construction of both phases of a new 74,000 s.f. child and adolescent residential treatment facility. The school serves 90 residents and 48-day students, ages ten to 18, in a non-institutional setting. The campus includes secure units for both evaluation/stabilization and post-trauma residents, as well as residential, classroom, dining, therapeutic, and indoor and outdoor recreational facilities.

Regional Institute for Children and Adolescents- Baltimore Dormitory (Phase I) & Multi-Service Building (Phase II), Maryland State Department of Health and Mental Hygiene, *Baltimore, MD*
Project Manager/Programmer for the programming, design, and construction of both phases of a new 67,000 s.f. adolescent residential treatment facility serving 45 residential and 60 day students.
