Density of Comparable Residential Projects

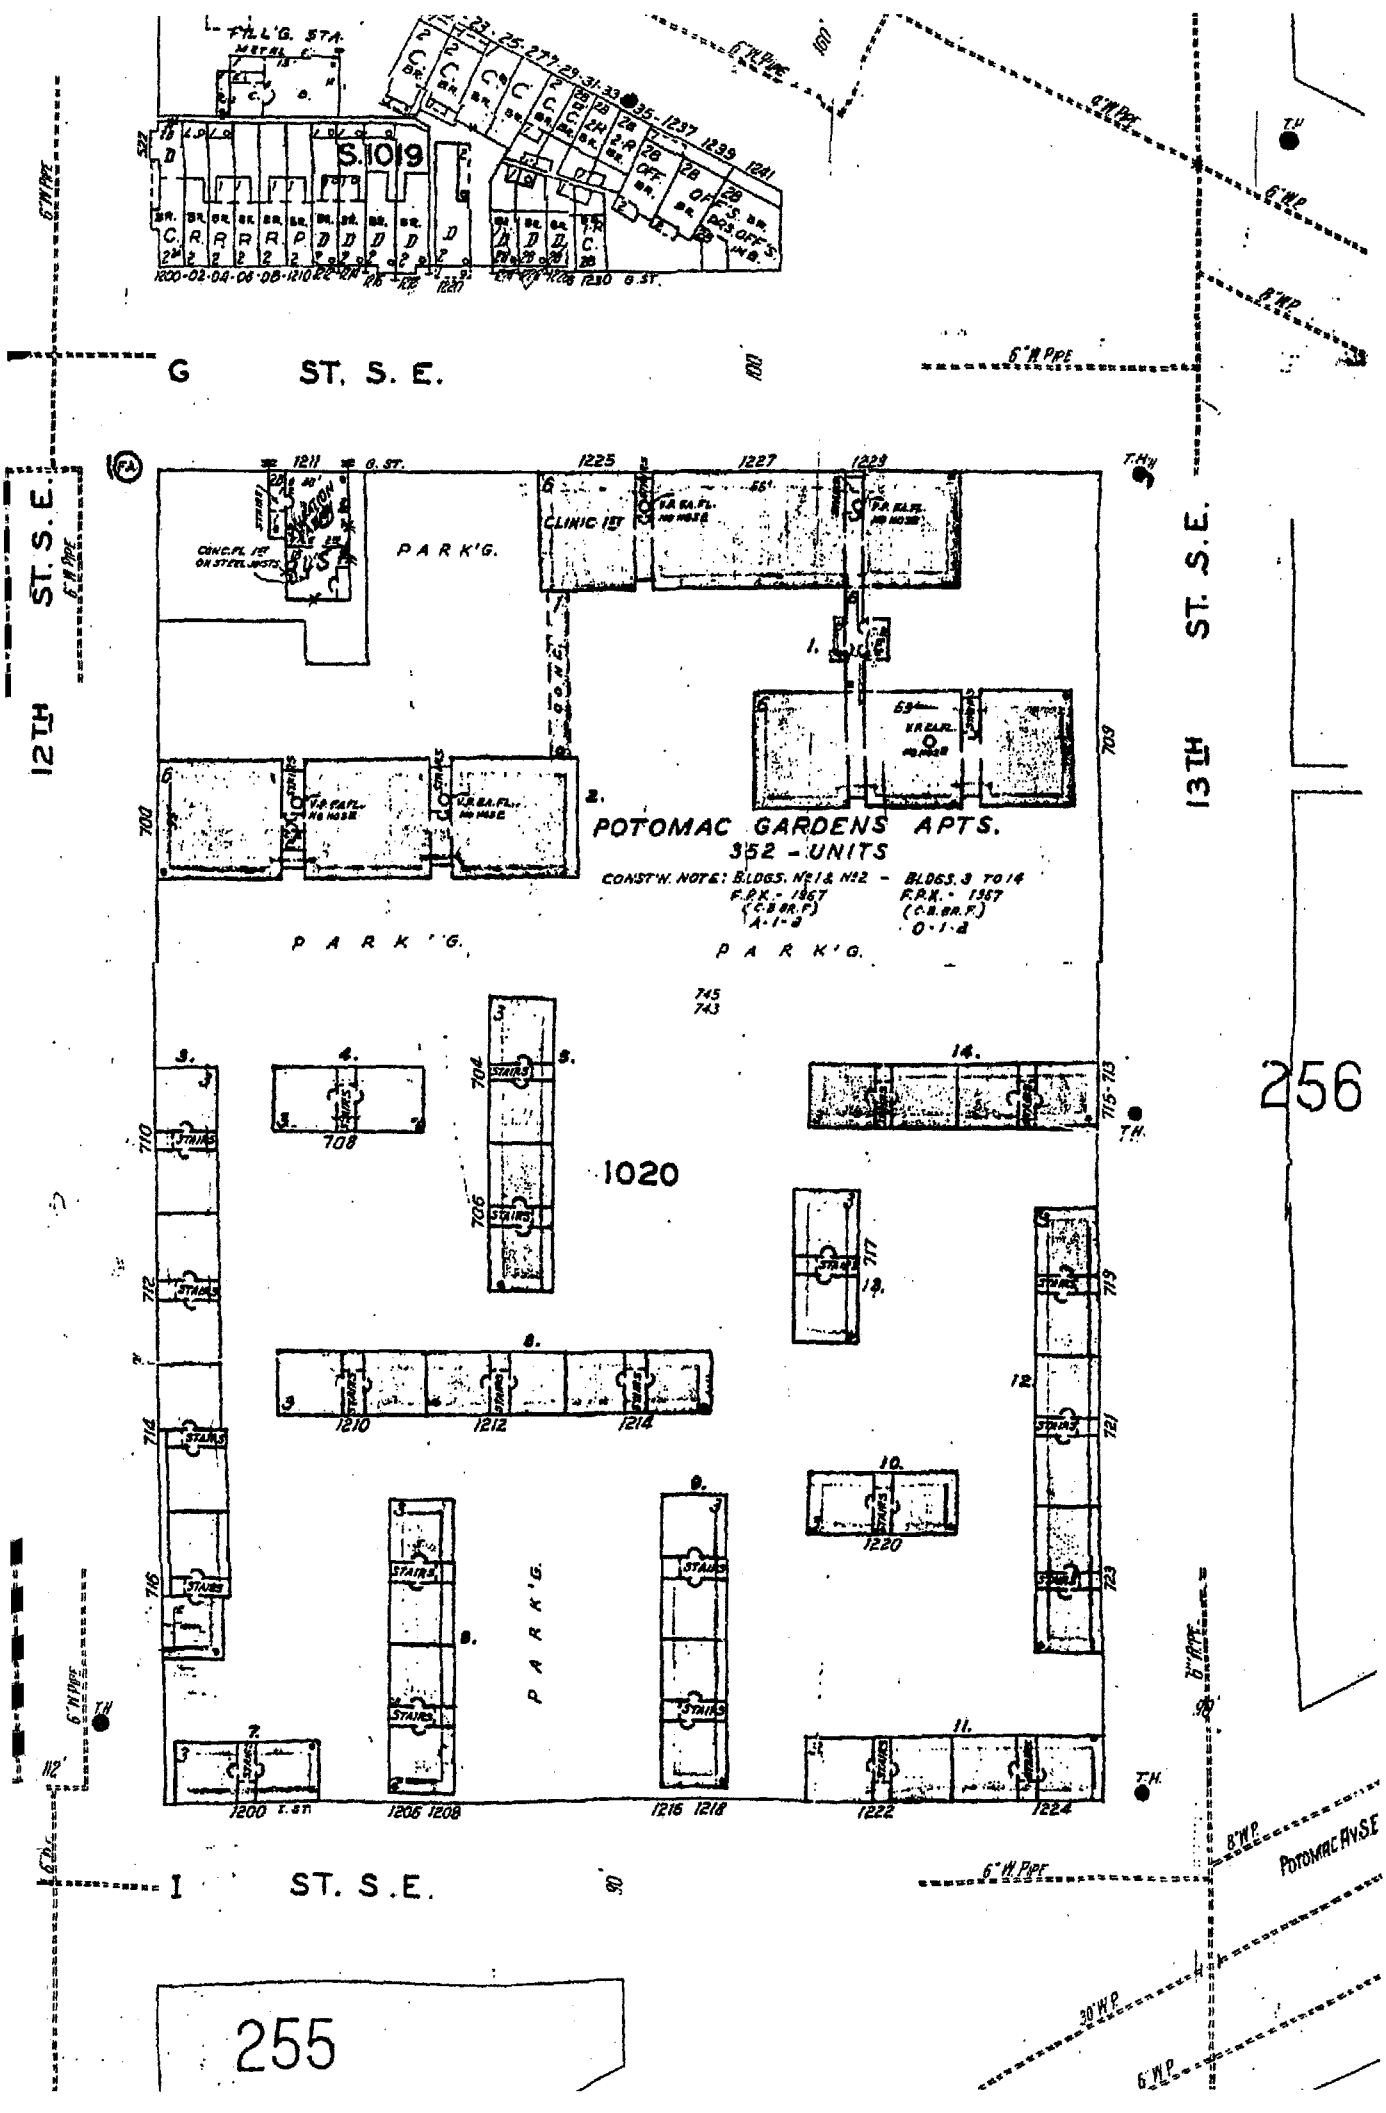

Project	Square	Lot	# of units	Land area	Acres	Units/acre
Tiber Island	502	184	498	218,564	5.02	99
Harbour Square	503	116	448	273,295	6.27	71
Waterside Towers	472	128	504	218,550	5.02	100
Total of above			1,450	710,409	16.31	89
Potomac Gardens	1020	85	352	275,284	6.32	56

Note: Tiber Island, Harbour Square and Waterside Towers are projects including high rise and townhouse components and are comparable to the overall residential density for the entire project.
Potomac Gardens is an example of an R-5-B development north of the Freeway comparable to the residential density of the consolidated PUD area.

A Study of Residential Density

Interpretive Key:

- Taxed properties
- Federal properties (none residential)
- DC properties (none residential)
- Religious institutions (none residential)

Properties in "***Residential***" Computer Assisted Mass Appraisal" (CAMA) database

Properties in "***Condominium***" CAMA database

Properties in "***Commercial***" CAMA database (those in apartment use being counted as "residential" and others being omitted from residential density calculations).
