Re: 4600 Wisconsin Avenue
No Impact (Zone of Influence)
250715.004

Dear Mr. Omelchencko:

Receipt is acknowledged of documents and plans for the proposed building structure project located at 4600 Wisconsin Avenue. It is understood the general scope of the work is as described in the cross-section location plans and calculations package that have been submitted.

WMATA has completed its review of the plans. Although the proposed construction activity falls within the limits of our Zone of Influence; as defined in WMATA's "Adjacent Construction Design Manual" (the Manual), given the nature and extent of the work indicated on the plans, WMATA has concluded that this project will not adversely impact WMATA facilities or installations and will not require further review at this time. Notwithstanding the above conclusion, WMATA still fully expects you and your contractors to take all necessary precautions to safeguard WMATA facilities and operations from any adverse impact. Should there be any blasting during excavation, it is required to submit adequate plans for review and approval. The specific requirements for performing work adjacent to WMATA facilities are fully set forth in the Manual.

Lastly, WMATA reserves the right to inspect the project site and plans inspectors or other personnel, at its discretion, on the site to observe the effects of the project construction on its adjacent transit facilities.

Please call 202-962-2526 should there be any further questions.

Sincerely,

Thomas R. Robinson, Jr.
Director
Joint Development and Adjacent Construction
