Re: Case No. 04-07
DC Water and Sewer Authority Main and O Street SE Pumping Stations

Dear Chairperson Mitten:

At its duly noticed regular meeting on April 12, 2004 ANC 6D voted 7-0 to support the application of the DC Water and Sewer Authority for the renovation of the two pumping stations located in the Southwest Federal Center renewal area at Main and O Streets SE. A quorum is four members.

The Commission is pleased that these outdated facilities will be upgraded, and that the plan calls for systems that will help reduce the odor emanating from the current site. However, included in the resolution of support is language urging the Applicant and the Zoning Commission to work together to find ways of shortening the construction program, now scheduled for completion in 2006. Because of the extensive amount of new construction that is occurring in that immediate area, the Commission is concerned about the added inconvenience and discomfort another long-term project will cause to those living and working in the surrounding area.

We hope you will give our views great weight as you reach your judgment on this project.

Sincerely,

Ahmed Assalaam
