Re: Georgetown University Special Exception Application for Further Processing

Dear Members of the Board.

Today Georgetown University ("Georgetown") and the Georgetown University Hospital (the "Hospital") filed the attached special application for further processing with the Zoning Commission. If approved, the application would permit Georgetown and the Hospital to construct a small addition to the Hospital's existing Bles Building (1200 square feet) to house new CyberKnife equipment, which provides painless, non-invasive treatment for tumors

Given the importance of this new medical technology, the application has been filed so that it can be scheduled for hearing as quickly as possible. We anticipate an early May hearing date

We fully understand that the further processing application cannot be decided until the Board has taken action on the remand case, but we hope that will occur prior to the May hearing date

Very truly yours,

Maureen Dwyer
