PPB Inc. (1991 - 1999) 151 North Shelby Street

Vice President - Design and Construction Louisville, Kentucky 40202

With an accumulative background of 20 years experience in design and construction, Paul provided a comprehensive knowledge of project development from initial planning through construction to facility occupancy. Focusing on healthcare, and more specifically - oncology services since 1991. Paul lead the most experienced and specialized radiation and medical oncology design and construction team in the country. Paul and the PPB development staff have been involved in the design and construction of over 125 oncology facilities, ranging from small renovations to large comprehensive cancer centers. Paul orchestrated the design/build facet of PPB, which was already a world-renowned radiation shielding and door company. In addition to the numerous design and construction projects, PPB has completed over 500 radiation shielded and/or door projects.
