

# Bryan Cannon

## Design Principal for Architecture

With more than 18 years experience in architecture, planning and urban design, Bryan's background contains a diverse mix of architectural building types including research and laboratory buildings, healthcare, embassies, museums, federal offices, educational buildings and religious facilities. As a ZGF design principal, he is currently the leader of design teams for the Max Planck Florida Institute, a 100,000 SF research building that will serve as the Germany-based Max Planck Society's first facility in the United States, the 160,000 SF Emory University Health Sciences Research Building in Atlanta, and the Department of Homeland Security Headquarters Consolidation project on the west campus of St. Elizabeths Hospital in Washington, DC, comprising 1,000,000 SF of new office space to be constructed on a National Historic Landmark Campus. Bryan brings to his work a balanced interest in design, a sense of place, careful use of resources, programmatic needs, and advanced technical solutions.
