

Petition in Support of New York Avenue Development

The undersigned residents of the Mount Vernon Square neighborhood support the project at 465-471 New York Avenue, NW, HPA #07-410 by Bozzuto Development Company and any zoning relief that may be required and request that the Historic Preservation Review Board grant conceptual approval. The project includes the demolition of 471 New York Avenue which is a noncontributing building with serious loss of structural and historic integrity, the relocation and renovation of 465 New York Avenue which is a contributing building, and construction of an apartment building. The project steps in height from the 3 story historic building to a height of 13 floors adjacent to the Yale Laundry site which is at that same height. The project will add significantly to the housing stock in the neighborhood and has been designed to respect and enhance the historic features of the site. The project is being developed at the same time as the Bozzuto project across New York Avenue to the south and will also help create a gateway for the neighborhood.
