Subject: I Support Changes to DC's Parking Regulations

Dear Zoning Commission,

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. In this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

This is an opportunity to ensure our city grows to be even more walkable while encouraging more cycling and transit use, improving air quality, and reducing traffic congestion.

Please vote to support the changes proposed by Office of Planning, including:

- removing parking minimums for all housing and some commercial uses
- implementing parking maximums where appropriate
- requiring larger buildings to include bicycle parking
- encouraging car sharing (i.e. Zipcar),
- allowing shared parking, and
- charging developers who want to build excess parking.

Sincerely,
Shawn Magnuson

Washington, DC 20001

Subject: I do not support changes to the parking laws

Dear Zoning Commission,

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. In this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

One of the reasons that the heart of Adams Morgan is so crowded is that it is not close to a metro. The same goes for Georgetown. Not all condos or huge commercial districts are metro accessible and quite frankly most people are not even willing to take metrobus. Therefore people drive and (hopefully they are carpooling).

One of the major complaints about the new stadium is that there is not enough parking therefore the parking rates in Eastern Market/Barracks Row area have increased. This doesn't alleviate crowded streets. It just makes people spend more money on parking meters.

New construction and projects need to incorporate parking spaces into their designs when possible to do their part in alleviating street traffic caused by their customers or residences.

Sincerely,
Miya Bazley

D.C. OFFICE OF ZONING
2008 JUL 28 AM 8:08

Dear Zoning Commission,

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. In this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

By promoting a less car-centric vision of moving people around, these proposed changes to DC's parking regulations represent a great opportunity to ensure that getting around the city is easy for everyone, regardless of the mode of transportation they use.

I take Metrobus almost every day, and I frequently find that buses are delayed because of heavy traffic. Incentivizing the use of Metro, bicycles, walking, and other modes of transportation would go a long way towards making it easier (and more predictable) to get around DC.

Please vote to support the proposed changes to DC's parking regulations.

Sincerely,
Ian Valentine

Subject: I Support Changes to DC's Parking Regulations

Dear Zoning Commission,

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. At this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

This is an opportunity to ensure our city grows to be even more walkable while encouraging more cycling and transit use, improving air quality, and reducing traffic congestion.

Please vote to support the changes proposed by Office of Planning, including:

- removing parking minimums for all housing and some commercial uses
- implementing parking maximums where appropriate
- requiring larger buildings to include bicycle parking
- encouraging car sharing (i.e. Zipcar),
- allowing shared parking, and
- charging developers who want to build excess parking.

Sincerely,
Michael Sappol

Dear Zoning Commission,

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. In this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

As a resident of DC who does not own a car and travels almost everywhere by bike, I support making changes that will be better for the environment and healthier for all of us. There are many solutions that could make this better including:

- removing parking minimums for all housing and some commercial uses
- implementing parking maximums where appropriate
- requiring larger buildings to include bicycle parking
- encouraging car sharing,
- allowing shared parking, and
- charging developers who want to build excess parking.

Additionally, one problem that I've found, is that because I don't own a car, if I have a car temporarily (e.g. a rental or borrowed from a friend)- to run errands, etc. it is difficult for me to park the car in front of my house because of the permit requirements. While I support the permit requirements, people who choose to not own cars are penalized because the process for obtaining a temporary parking permit each time is cumbersome and limited. Thus, a situation that would help residents who do not own cars is to facilitate a mechanism so that they can have a permanent "temporary" parking pass.

While I don't know that such a process would encourage more people to get rid of their cars, it would at least encourage the people who have chosen not to have cars to continue to do so.

Thank you for looking into this issue and trying to make a difference.

Sincerely,
Jennifer Fischer

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. In this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

As a regular business visitor to DC from the UK, staying downtown in a corporate apartment when I am here, I wanted to stress the importance of parking to visitors like myself.

I am an avid user of the Zipcar system and would encourage you to ensure that this and other car sharing schemes are allocated plenty of the available parking spaces.

I am also a keen Metro user and would urge you to ensure that these two systems are given the resources to integrate and discourage private cars from the city centre.

Please vote to support the changes proposed by Office of Planning, including:

- removing parking minimums for all housing and some commercial uses
- implementing parking maximums where appropriate
- requiring larger buildings to include bicycle parking
- encouraging car sharing (i.e. Zipcar),
- allowing shared parking, and
- charging developers who want to build excess parking.

- removing parking minimums for all housing and some commercial uses
- requiring larger buildings to include bicycle parking
- encouraging car sharing (i.e. Zipcar)
- allowing shared parking

People who choose to own and use cars in the District should take care of their parking needs without the costs being passed on via zoning regulations to others who do not own cars. Special treatment of those who own cars does not encourage the best transportation solutions for our town.

Thank you for your time, and I hope you will take these things into consideration in your July 31 hearing on this issue.

Sincerely,
David Carpenter

RE: Case No. 08-06-2

I support the proposed changes to DC's parking regulations. In this time of rising gas prices and concern about climate change, it's important we plan for a more walkable, vibrant, and affordable DC.

I am a resident of the District of Columbia in Ward 3. i am also a member of Ward 3 Vision and a Zipcar user. I support "smartgrowth" and a more sustainable, liveable city that uses density in appropriate places and in a responsible manner to improve the vibrancy and liveability of our city.

These changes are an opportunity to ensure our city grows to be even more walkable while encouraging more cycling and transit use, improving air quality, and reducing traffic congestion.

Please vote to support the changes proposed by Office of Planning, including:
