## CHAPTER 1 -INTRODUCTION TO DOWNTOWN (D) ZONES

### 100 PURPOSES OF DOWNTOWN (D) ZONES

- 100.1 The purposes of the Downtown (D) zones (D-1-R, D-2, D-3, D-4, D-4-R, D-5, D-5-R, D-6, D-6-R, D-7, and D-8) are to provide for the orderly development and use of land and structures in areas the Comprehensive Plan generally characterized as:
- (a) Central Washington; or
  - (b) Appropriate for a high-density mix of office, retail, service, residential, entertainment, lodging, institutional, and other uses, often grouped into neighborhoods with distinct identities.
- 100.2 The provisions of this subtitle are intended to:
- (a) Create a balanced mixture of land uses by providing incentives and requirements for retail, residential, entertainment, arts, and cultural uses the Comprehensive Plan identifies as essential to a successful downtown, and by guiding and regulating office development;
  - (b) Protect historic buildings and places while permitting compatible new development, subject to the review process of the Historic Landmark and Historic District Protection Act of 1978;
  - (c) Guide the design of buildings into being ~~generally consistent~~not inconsistent with the policies of the Central Washington Element and other relevant elements of the Comprehensive Plan;
  - (d) Provide for the return of historic L'Enfant streets and rights-of way;
  - (e) Establish design or use requirements for the ground-level of buildings facing certain streets that are of high priority for furthering retail, pedestrian or historic purposes contained in the Comprehensive Plan;
  - (f) Encourage the development of publicly-accessible open space;

200.1 Gross floor area shall be measured as specified in Subtitle B § 304.

200.2 If a historic landmark or contributing building in a historic district has an existing density of 6.0 floor area ratio (FAR) or less, the portion of the lot within the historic structure's footprint:

- (a) Shall be limited to an on-site ~~density~~FAR of 6.0 ~~FAR~~;
- (b) Shall be exempt from the minimum residential requirements of the lot's zone;
- (c) May generate density credits under the provisions of Subtitle I, Chapter 8; and
- (d) May average the permitted 6.0 FAR with the permitted FARs of other lots that are part under common ownership or for which there has been an agreement as to the allocation of the development FAR within the same square as the historic property or contributing building, including lots and portions of lots not subject to the 6.0 FAR maximum, to achieve a composite FAR ~~for the entire development if it is part of a multi-lot development.~~

200.3 If a historic landmark or contributing building ~~or structure~~ in a historic district has an existing ~~density~~FAR of more than 6.0 ~~FAR~~on the portion of the lot within the historic structure's footprint, it shall not increase its existing FAR within the historic structure's footprint, but shall be permitted to occupy all of the existing floors of the building for uses permitted within the zone and may generate density credits under the provisions of Subtitle I, Chapter 8.

200.4 In all D zones, except for the D-1-R zone, a property may achieve a base FAR for non-residential uses if it satisfies any minimum residential requirement for the zone. Additional FAR not to exceed the maximum FAR for the zone specified in Subtitle I, Chapter 4 may be achieved by:

- (a) Providing additional FAR devoted to residential use that is not used to meet the minimum residential floor area requirements specified for the zone provided that additional residential FAR does not provide housing for students in a building owned or leased by a public, charter, parochial, or private school or community college, college, or university for the purpose of housing students enrolled in the school owning or leasing the building;

- (b) Providing additional FAR that is not used to meet a geographic sub-area's minimum use-type requirements;

## CHAPTER 6 LOCATION-BASED REGULATIONS FOR DOWNTOWN SUB-AREAS AND DESIGNATED STREET SEGMENTS

### 600 INTRODUCTION

600.1 This chapter contains zoning regulations intended, to assist in achieving goals established by the Comprehensive Plan, Small Area Plans, or prior versions of this subtitle for specific geographic locations within the area encompassed by the downtown zones. Each sub-area may include multiple zone districts.

600.2 In the sub-areas the general use and design regulations for D zones are supplemented by additional use or design permissions, restrictions, or requirements. These vary by the geographic sub-area locations described in Subtitle I §§ 606 through 618. The sub-area use and design regulations are applied to sites based on their adjacency to a side or sides of certain designated segments of street rights-of-way.

600.3 The objectives of designating sub-areas and street segments, requirements, and permissions are to:

- (a) Strengthen retail, arts, and other preferred uses, through the establishment of a hierarchy of primary and secondary designated streets;
- (b) Enhance pedestrian environments;
- (c) Foster the building of open spaces and neighborhood centers;
- (d) Establish principal intersections as focal points for neighborhoods;
- (e) Establish massing transitions between areas with different uses or scales; and
- (f) Create upper story setbacks through the designation of other designated street segments to protect important vistas highlighted in the Comprehensive Plan.

600.4 ~~Street~~Designated street segments with the same classification generally have similar use and design requirements or permissions, but may also be modified by sub-area requirements—as generally summarized below:

- (a) Designated primary street segments of Figure I § 601(a): Illustration of Designated Primary Street Segments generally have the most intensive use and design requirements, including strict regulations governing vehicular entrance openings—~~i~~

(b) Designated secondary street segments- of Figure I § 601(b): Illustration of Designated Secondary Street Segments have similar use regulations as primary street segments, but often with less FAR requirements for certain uses, and less restrictive regulations governing ground floor heights and vehicular entrances/exits facing onto a designated secondary street.

(g)(c) Designated ~~other~~tertiary street segments of Figure I § 603.1: Illustration of Designated ~~Other~~Tertiary Street Segments are generally regulated for upper story setbacks and are detailed within the regulations for individual sub-areas. Sub-area regulations begin in Subtitle I § 606.

~~600.4~~600.5 If a lot faces more than one (1) designated street segment, each frontage is governed by the corresponding regulations for that designated street segment.

~~600.5~~600.6 For a structure with frontage on a designated primary, secondary, or other street segment listed in this chapter, an applicant for a building permit or a certificate of occupancy involving ten thousand square feet (10,000 sq. ft.) or more shall provide a copy of the application, or those portions of the application affected by the D zone provisions, to the Director of the Office of Planning at the time of filing with the Zoning Administrator. The Director shall, within ten (10) business days of the filing, provide the Zoning Administrator with a memorandum setting forth the Office of Planning's interpretation of the application's compliance with the regulations of the relevant D zones.

# **GENERAL USE REQUIREMENTS FOR BUILDINGS ON PRIMARY AND SECONDARY DESIGNATED STREET SEGMENTS**

**FIGURE I § 601(a): ILLUSTRATION OF DESIGNATED PRIMARY STREET SEGMENTS**

**FIGURE I § 601(b): ILLUSTRATION OF DESIGNATED SECONDARY STREET SEGMENTS**

(c) Devote one hundred percent (100%) of the building's street frontage along the primary designated street segment to required uses identified in Subtitle I § 602.2, except for space required for fire control or devoted to building entrances for pedestrians, or for vehicular parking and loading entrances that are:

(1) Permitted by Subtitle I § 610.4 within the Massachusetts Avenue and Mount Vernon Square Sub-Area;

~~601.5 Within the NoMA Sub Area described in Subtitle I § 615, the requirements of Subtitle I § 602.3 shall not apply to the portion of a building more than one hundred fifty feet (150 ft.) west of the property line adjacent to the west side of First Street, N.E.~~

## 602 GENERAL DESIGN REQUIREMENTS FOR BUILDINGS ON PRIMARY AND SECONDARY DESIGNATED STREET SEGMENTS

602.1 With the exception of buildings devoted entirely to residential uses, or to theaters, historically designated buildings, or places of worship, the following design requirements shall apply to the portion of a building or structure with frontage on a primary or secondary designated street segment unless otherwise modified by the design requirements of this section or the requirements for a designated street segment in a sub-area:

- (a) The ground floor shall have a minimum clear height of fourteen feet (14 ft.) for a continuous depth of at least thirty-six feet (36 ft.) from the building line on a designated primary, but not a designated secondary, street segment;
- (b) The ground story shall devote at least fifty percent (50%) of the surface area facing a designated primary or secondary street segment to display windows or pedestrian entrances having clear low-emissivity glass, and ensure that the view through the display windows and pedestrian entrances is not blocked for at least ten feet (10 ft.) in from the building face; and
- (c) Ground floor pedestrian entrances, or areas where a future ground floor entrance could be installed without structural changes, shall be located no more than an average distance of forty feet (40 ft.) apart on the façade facing the designated primary or secondary street segment. In no case shall there be less than one (1) door.

602.2 No vehicular garage or loading entrance or exit shall be permitted in the portions of façades adjacent to a designated primary street, unless it is:

- (a) On a designated primary street segment listed in the Mount Vernon Triangle Sub-Area pursuant to Subtitle I § 611.2, for which vehicular garage or loading entrances and exits are governed by Subtitle I §§ 611.46 through 611.10;
- (b) Required by DDOT; or
- (c) Permitted by the Board of Zoning Adjustment as a special exception evaluated by the criteria in Subtitle I § 602.3.

602.3 Exceptions from the prohibitions and limitations of Subtitle I § 602.2 shall be permitted if granted by the Board of Zoning Adjustment as a special exception, provided the applicant demonstrates that:

- (a) There is no practical alternative means of serving the parking, loading, or drop-off needs of the building to be served by the proposed driveway, such as signage approved by DDOT, that would direct vehicles to an alternative entrance point within the same square;
- (b) The vehicular entrance will not impede the flow of pedestrian traffic on designated primary street frontage; and
- (c) The driveway that would access the proposed parking or loading entrance or exit is not inconsistent with DDOT landscape plans for the public rights of way on the designated street frontage, to the extent that such plans exist at the time of the special exception application.

602.4 Exceptions from the prohibitions and limitations of Subtitle I § 602.1(a) shall be permitted for structures existing prior to the effective date of this title if the Zoning Administrator determines that the slab-to-slab height of the existing structure's first or second floor would have to be structurally altered in order to meet the requirement.

### **603 BUILDINGS ON ~~OTHER~~—DESIGNATED TERTIARY STREETS: GENERAL USE AND DESIGN REQUIREMENTS**

603.1 Figure I § 603.1 illustrates the designated ~~other~~tertiary street segments:
