PROJECT SUMMARY

American University (the "Applicant") proposes a modification to the approved East Campus underground garage from one-level to two-levels, remove the underground bus turn around, and maintain the previously approved 150 parking spaces in the newly configured two-level garage.

DDOT RECOMMENDATION

The District Department of Transportation (DDOT) has reviewed the Applicant's request and determined that based on the information provided, the proposed modification will have no adverse impacts on the travel conditions of the District's transportation network. The transportation impacts of the 150 parking spaces were reviewed as part of the Campus Plan and appropriately mitigated during that process. In addition, DDOT agrees with the Applicant proposed condition to prohibit motor coaches and charter buses to come to the East Campus, in order to reduce noise idling impacts
