Attention: Anthony Hood, Chairman

Re: Case 11-07C. Request for Minor Modification

Dear Chairman Hood:

My name is Maria Kress and I live at 4302 Westover Place, NW, Washington, DC, which is located less than 15 feet from the wall that divides and separates the Westover Community from AU's East Campus. I am writing to you and the Commission to express my concerns and opinions regarding Case 11-07C.

American University has requested permission to construct a two level, below-grade parking garage on the East Campus currently under construction. In addition, there is a further clarification requested which states that charter buses and motor coaches shall not be permitted on the East Campus.

I want to express my support of AU's request to construct a two level underground garage to meet the requirements of the Zoning Commission Order to provide 150 parking spaces with no further delays in their current construction schedule. I believe that further delays could create objectionable conditions and would not be in my best interest or for the community as a whole. I support and welcome the prohibition of charter buses and/or motor coaches on the East Campus.

Respectfully submitted,

Maria Kress
