Re ZC Case No 14-11

Dear Chairman Hood and Members of the Commission

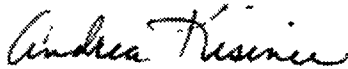

I write in support of ZC Case No 14-11

I believe these pop-up additions, for the most part, detract from the neighborhood. Too often there is little to no effort to blend in with the existing neighborhood, often using veneers that may or may not appear natural.

This amendment has the potential to help the zoning commission gain some control over these run-away developments. It seems that under the current guidelines, developers are getting rubber-stamped approvals possibly due to the lack of specificity about the nature of pop-ups.

I'd like to see homeowners/property owners limited to adding a single story to their buildings, if they need the room. Further, I don't think that just because a residential property got zoned commercial, that it should be exempt from the pop-up restrictions.

Please adopt this amendment.
