

Dear D.C. Zoning Commissioners,

I am a current D.C. resident and fully support MidCity Development's application 14-18A which will come before the Commission this Thursday.

MidCity's voluntary decision to retain the project based Section 8 housing and their current and future plans for social service programming for affordable residents reflects their longstanding commitment to affordable housing in the District. Further, this application presents two beautifully designed buildings which will provide high quality housing for current residents to replace outdated and unattractive housing stock.

The overall project will bring opportunity to residents and the overall community and I support the responsible efforts of MidCity in their development and community engagement.

Thank you,

Matthew C. Bleier
