Experience

Dan Snook is a project designer at McAllister Architects. In this role, Mr. Snook contributes to the firm's architectural projects and actively participates in the design process. His project management experience ranges from concept design through construction documentation and administration. Mr. Snook coordinates with clients, consultants, general contractors, and other project stakeholders. His daily responsibilities include design work, Auto Cad documentation and detailing, coordination with the firm's partners and subcontractors, and Building Information Modeling.
