CONSOLIDATED PUD CHECKLIST

SQUARE: 3587		LOT: 4	
SECTION	ITEM	SHEET NUMBER	
2406.11a	COMPLETED APPLICATION FORM	IN WRITTEN APPLICATION	
2406.11b	ZONING PLAN: A map showing the location of the proposed project, the existing zoning for the subject site, the zoning of adjacent properties, and any proposed change of zoning.	A-03	
2406.11c	STATEMENT OF PURPOSE: A statement of the purposes and objectives of the project, including the proposed form of development and a detailed statement elucidating how the application meets the PUD evaluation standards in section 2403.	IN WRITTEN APPLICATION	
2406.11D	SITE PLAN: A general site, landscape, and development plan indicating the proposed use, location, dimensions, number of stories, and height of each building, and the exsact area of the total site.	L-01/C-03	
2406.11e	DEVELOPMENT DATA: (1) The area and dimensions of each lot proposed for each building and the exact area of the total site; area of the total site; (2) The percentage of lot occupancy of each building on each lot and the total percentage of lot occupancy for all buildings on the entire site; (3) The gross floor area and floor area ratio for each building on each lot, including a break-down for each use, and the total gross floor area and floor area ratio for all buildings on the entire site, including a breakdown for each use; (4) A circulation plan, including the location of all vehicular and pedestrian access ways and the location and number of all off-street parking spaces and loading berths, including an indication of which spaces are designated for which use; (5) The existing topography of the development area; the location of all major natural features, including trees of six-inch (6 in.) caliper or greater; and the location and elevations of public or private streets, alley, or easements bounding or traversing the site, including an indication of which of the rights-of-way or easements are to be continued, relocated, or abandoned; (6) Estimated quantities of potable water required by the project, and of sanitary sewage and storm water to be generated including the methods of calculating those quantities; (7) Any other information needed to understand the unique character and problems of developing the PUD.	A-03 A-03 A-03 A-06 C-02 / A-04 C-07 LEED A-07	

2406.12a	COMPLETED APPLICATION FORM	IN WRITTEN APPLICATION
2406.12b	A detailed statement as to the uses to be located in the project, including the location, number, size, and types of stores, offices, residential, institutional, industrial, and other uses;	IN WRITTEN APPLICATION
2406.12c	SITE PLAN: A detailed site plan, showing the location and external dimensions of all buildings and structures, utilities and other easements, walkways, driveways, plazas, arcades, and any other open spaces;	C-03 / A-23
2406.12d	LANDSCAPE & GRADING PLAN: A detailed landscaping and grading plan, showing all existing contour lines, including graphic illustration of grades exceeding fifteen percent (15%) in five percent (5%) increments, landscaping to be retained, grades, planting, and landscaping. The plan shall also show the proposed drainage for the site, including the location of buildings, roads, sidewalks, water and sewer lines, inlets, and basins, and connections to public water and sewer lines. Proposed erosion control measures shall also be shown;	L-01 / C-03
2406.12e	FLOOR PLANS: Typical floor plans and architectural elevations for each building, sections for each building and the project as a whole, and sections and elevations of the entire square within which the project is located;	A-12 through A-26
2406.12f	CIRCULATION PLAN: A final detailed circulation plan showing all driveways and walkways, including widths, grades, and curb cuts, as well as detailed parking and loading plans;	A-06 / A-07 /A-20 / A-21 / A-23
2406.12g	OTHER INFORMATION: Any other information needed to understand the final design of the proposal, or information specifically requested by the Commission;	LEED A-07
2406.12h	A statement showing how the second-stage plans are in accordance with the intent and purposes of this title, the PUD process, and the first-stage approval.	N/A, THIS IS A CONSOLIDATED PUD APPLICATION

SHEET LIST

THE HIGHLINE at Union Market

The project site is located on the north side of the 300 block of Florida Avenue, N.E. The current use is a fast food restaurant with drive-through. To the west of the subject property is a piece of D.C. Government-owned that abuts the Amtrak/WMATA railroad tracks. To the east is a vacant lot at 340 Florida Avenue, approved as a future mixed-use development site. To the north of the subject property are industrial buildings that are mostly food distribution warehouses.

The project is sensitive to its varied context and responds in size, form, and in its use of materials. The program consists of approximately 315 market rate and affordable dwelling units, a ground level that is programmed with retail and residential uses that activate the street, and two levels of below grade parking. The project is located one block away from the NoMa-Gallaudet Metro Station and provides residents with ample, secure bicycle parking on the ground floor of the building. Parking and loading facilities are accessed from an existing curb cut on Florida Avenue at a signalized intersection with 3rd Street, N.E.

The modern-industrial architecture of the building is an interpretation of the historical and current warehouse, manufacturing, railroad, and commercial uses of the surrounding neighborhood, brought together in a dynamic arrangement. The basic form of the building was derived from an abstraction of steel shipping containers stacked on top of each other. The structure is a series of industrial-framed cubes with a warehouse style grid in a random "in/out" pattern on the Florida Avenue façade and wrapping around at the west façade, where the cubes take on a new pattern that incorporates metal-paneled boxes with industrial-style balconies reminiscent of rail cars. The combination of the warehouse-style grids with the varying cubes brings together the rail uses to the west and the warehouse uses to the north. The cube modules float on a recessed base on the third floor, as a transition to the brick and glass ground level and second floor façade. To articulate the set-back on the third floor, the design includes steel columns that echo the riveted steel supports that hold up the railroad underpass nearby. Rough industrial brick is anticipated for the masonry base. On the eastern portion of the ground level, the residential entrance is demarked with a suspended canopy. On the north façade, which faces into Union Market, brick elements of the south base are used to visually connect to the market, which incorporates similar materials. In the upper portion of the north façade, modules of the framed warehouse grid are incorporated to stitch the various elements of the entire building together. Industrial-style sash windows are utilized throughout. Accent balconies will be detailed with an expression reminiscent of fire escapes, and composite metal panels will be used at non-window façade locations.

The organization of the ground floor program will provide a sense of neighborhood activity and security at the street level. The residential entrance is located along Florida Avenue at the eastern-most portion of the site. The location of the residential entrance will help to provide a street presence with eyes on Florida Avenue 24 hours a day. Neighborhood retail storefronts are also situated along Florida Avenue to help enliven the streetscape and promote pedestrian activity. The plan envisions a neighborhood-serving use to occupy the western retail space closed to the proposed green space and the Metropolitan Branch Trail. In addition, residential units will be located on the ground floor facing an open court in the eastern corner of the Subject Property. The overall streetscape is intended to be an accessible amenity shared and enjoyed by the entire neighborhood.

In addition to the creation of affordable housing, a significant component of the project's public benefits is the creation of a public green space on the District-owned property to the west of the Subject Property, with provisions for a potential pedestrian connection to Morse Street into Union Market. The proposal includes building a landscaped public amenity on land that is currently overgrown with neglected trees and shrubbery and is littered with trash and debris. The Florida Market Small Area Plan envisions a pedestrian connection from Florida Avenue into Union Market in the 300 block of Florida Avenue, N.E. The development of the Subject Property and improvements to the adjacent District-owned land will be the first link in creating the connection to the market.

The building will be designed to integrate a host of sustainable features equivalent to LEED Silver, including: a green roof, bio retention facility, water-efficient landscaping, construction waste management techniques, recycled and sustainable materials, bicycle parking, energy-efficient building design and systems, and high density development at a transit-rich location.

PROJECT DESCRIPTION

ZONING ANALYSIS

Lot Area = 28,394 sq. ft.

COMPLIES W/ ZONING		
	Zoning Restriction	Proposed
Maximum Building Height DCMR 11, 2405.1	120' (Act of 1910)	120'
Maximum FAR DCMR 11, 2405.2	8.0	8.0
Maximum Lot Occupancy DCMR 11, 772.1	100%	69% - 72%
Minimum Parking DCMR 11, Chapter 21	For apartment house, 1 for each 4 dwelling units (315/4 = 79). For retail or service establishment in excess of 3,000s.f., 1 for each additional 750 s.f. of gross floor area: (8,472-3,000 = 5,472 / 750 = 7); Total required = 79 + 7 = 86	143 spaces provided
Bicycle parking DCMR 11, 2910.1	One bicycle parking space / 3 dwelling units; 315 ÷ 3 = 105	105 provided
Penthouse, Number of DCMR 11, 411.3	One permitted	One proposed
Penthouse FAR DCMR 11, 411.7	.37 FAR permitted	.37 FAR provided
Green Area Ratio	0.2 GAR	0.2 GAR

ZONING RELIEF REQUIRED		
	Zoning Restriction	Proposed
Minimum Rear Yard DCMR 11, 774.1	2½" per foot of height and 12' minimum = 22.88'	11'-2"
Minimum Open Court DCMR 11, 776.3	Minimum width = 4" per foot of height and 15' minimum 107" high court requires 35'-8" width	25'-5", 12'-8", 20'-10"
Court Niche DCMR 11, 776.7 & 776.8	Width/depth no less than 2/1; 3' depth rule	The design includes triangular court niches so these relationships vary and may not comply at certain points
Parking, Compact DCMR 11, 2511.2	40% maximum compact spaces	90 compact / 143 total = 63%
Minimum Loading DCMR 11, Chapter 22	For apartment house, 1 loading berth @55' deep and 1 service/delivery space @20' deep. For retail and service, 1 loading berth @ 30' deep.	One berth @ 30' and one 20' service & delivery space proposed
Loading Platform DCMR 11, Chapter 22	For apartment house, 1 loading platform @ 200 s.f.. For retail and service, 1 loading platform at 100 s.f.	One 200 s.f. platform provided
Penthouse, All the Same Height DCMR 11, 411.5	One height permitted	Two heights proposed: 12' and 20'-0"
Penthouse, Setback Act of 1910	1:1 setback ratio required	1:1 provided facing the public ROW and east and west facades; 1:1 not provided in the rear
